SUMMARY

Detail-oriented IT professional with 1 year of hands-on experience in building RESTful APIs and backend systems using Django and Django Rest Framework. Proficient in Python, OOP, SQL, DSA, and web technologies, with hands-on experience in developing Online Booking systems, File Tracking System, and Visitor Management with QR code Gatepass. Additionally, familiar with React and frontend development fundamentals. Passionate about problem-solving, optimizing backend performance, and expanding my expertise in full-stack development.

EXPERIENCE

April/24- Continue	Rourkela Club Booking System Intelisparkz Systems IT Services and Consulting - Developed a comprehensive booking system for managing reservations of event venues, including rooms, halls, and mandaps. The system streamlines the process of booking slots, handling payments, and managing invoices. It also provides detailed tracking and management of payment transactions through various payment gateways. - Led the development of the backend architecture, ensuring efficient handling of booking logic, payment processing, and transaction management. - Designed and implemented the database schema, optimizing relationships between bookings, transactions, and invoices. - Integrated multiple payment gateways and methods, ensuring secure and reliable transaction processing. - Technologies Used: Backend: Django, Django Rest Framework (DRF), Frontend: React.js, Database: MySQL, Payment Gateways: Paytm, Razorpay, UPI integrations
	Digital Signage Intelisparkz Systems IT Services and Consulting <i>Developed and Maintained Digital Signage Backend:</i> Designed and implemented Django models to support a digital signage system, including MediaLibrary, Layout, Device, and various playlist types (MediaPlaylist, TextPlaylist, BreakingNewsPlaylist). - Implemented a file handling system for media uploads, including a dynamic file path generation method and automated file deletion upon model instance removal. - Technologies Used: Backend: Django, Django Rest Framework (DRF), Frontend: React.js, Database: MySQL
Aug/23 -Mar/24	Python Full Stack Developer Intern Pyspider - Assisted in the development of web applications using Python and Django, working on both backend and frontend components. - Contributed to designing and implementing backend functionalities, including creating and managing Django models, developing APIs, and handling database operations. - Implemented and managed API integration within React applications using Axios and Fetch. Designed and developed components to fetch, display, and update data from external APIs.
