Project

1. Title of the project – **“Primary health care using a mobile application”**

Description – “Primary health care system” is an application developed to make an environment where doctors and patients can stay together. A patient can take primary health checkups from their home with the help of our application in a minimum time with a health care tool kit. It will also maintain the information about the patient observation data so that a doctor can predict their emergency and notify them.

2. Title of the project - **“Zero Trust Application Access Security”**

Description- The Zero Trust Application Security by InstaSafe provides secure single-click unified access to SSH and RDP Servers and Applications and workforces hosted anywhere, which helps uplift your security posture.
