

OBJECTIVE:

Seeking challenging assignments in the field of Software Engineering to facilitate the maximum utilization of my skills in making a positive difference to the organization.

PROJECTS:

Product Listing Portal

- Developed a Product Listing Portal, worked both upon frontend and backend, used React for the frontend, Django for the backend and MySQL for data storage. Implemented user module features including login, logout and password change functionalities along with product listing, product searching, adding products to cart and purchase history. Utilized Django REST Framework (DRF) to create RESTful APIs for handling user authentication and product management, enhancing data management and scalability.
- Source Code:-<https://github.com/AbhaySmaran/Django-React-Auth-App>

Doctor Appointment System

- Developed a Doctor Appointment System using React for frontend, MySQL for database storage and Django REST Framework (DRF), enabling seamless communication between the frontend and backend through REST APIs, featuring patient registration, appointment scheduling, medical records management, role-based access control and additionally added a dashboard that provides visual insights through graphs on patient demographics, appointment trends, and report counts, enabling better administrative decision-making.

TECHNICAL SKILLS :

- Programming Languages: Python, Java, JavaScript, SQL
- Web Development: React, Django, Django REST Framework (DRF), HTML, CSS
- Databases: MySQL
- Tools: PyCharm, Microsoft Visual Studio, MySQL Workbench
- Versioning tools: Git, GitHub

EDUCATION:

Bachelor of Technology(B.Tech) in Computer Science and Engineering
Seemanta Engineering College, Mayurbhanj, Odisha, India.

2019-2023
