ABOUT ME

I'm Abhijit, a seasoned React.js developer with more than a year of hands-on experience in frontend development. As a seasoned React.js developer, I excel in crafting dynamic user interfaces with a keen eye for performance optimization and code maintainability.

EXPERIENCE

CoffeeWeb Technologies, Bangalore—Junior Software Engineer

May 2023 - PRESENT

Key responsibilities:

- Spearheaded the development of the CoffeeWeb Project, introducing real-time international coffee rates and news functionality, resulting in a 20% increase in user engagement within the first month.
- Collaborated with the UX/UI design team to implement responsive and visually appealing user interfaces.
- Implemented state management using Redux for efficient data flow and application state control.

JSpiders, Bangalore— Intern

November 2022 - May 2023

Key responsibilities:

- Engaged in comprehensive training and hands-on experience in Java full stack development.
- Acquired proficiency in various technologies and tools essential for full stack development, including frontend frameworks like React.js.
- Completed projects and assignments demonstrating understanding and application of Java full stack development concepts.
