OBJECTIVE

Full Stack Developer well-versed in end-to-end software development with a zeal for building intuitive products with clean human-centric design.

EDUCATION

GITAM(Deemed To Be University), Visakhapatnam, B.Tech, CSE

8.9 CGPA (2017-2021)

D.A.V Public School, N.I.T Campus Jamshedpur

Grade 12 - **75%** (2017)

Grade 10 - **9.0 CGPA** (2015)

EXPERIENCE

Full Stack Engineer | INCAPSULATE INDIA PRIVATE LIMITED, Ahmedabad, India
| *July 2021 - Present*

Mobile 2.0

I am involved in enhancement of the 311 capsule. We are building a **cross-platform, react native application** from scratch that gives users access to non-emergency City services and info about city programs in the US.

My responsibilities in the team includes:-

- Developing responsive native components ensuring performance and quality.
- Maintaining **100% code coverage** on critical components.
- Creating interactive UIs using One-way data flow, VDOM, and JSX concepts.
- Implementing accessibility, translations and, **client configurable theming**.
- Deployment of application on Bitrise builds.

Software Developer - Intern | GROOM EDUTECH PRIVATE LIMITED, Hyderabad, India | *June-August 2020*

The main focus of my internship project was to develop a portal in **MEAN stack** that provides features like sign-in, sign-up, profile update and files upload to the user.

Learnings from the internship include:-

- UI design and Front-end development in Angular-9 from scratch.
- Creating RESTful API and JWT Authentication in Node Js.
- Store and display files upload using Express Js, mongoose and multer.

Project Intern, ITS | TATA Steel, Jamshedpur, India | *May-June 2019*

The project aimed to study the implementation of **e-Permit Mobility Solution** and integrated safe work systems in TATA STEEL Ltd.

The conclusion drawn from the project:

- SAP PM in e-permit and process flow of e-PTW Mobility Solution.
- SAP Logon vs Mobility Solution.

SKILLS

- Programming Languages: C, C++, JavaScript+ES6, Python 3
- Web Technology: HTML, CSS, React JS, React Native, Sass/SCSS, jQuery
- Frameworks: Angular, Bootstrap
- Testing Libraries: Jest, Enzyme, React Testing Library, react-test-renderer
- Databases: MySQL, MongoDB
- Web Hosting: Github Pages, Firebase, Heroku
- Utilities: Git, GitHub, GitLab

EXTRA-CURRICULAR ACTIVITIES

- **Scrum Master** for Mobile 2.0 project.
- **Host** for monthly Brown Bag sessions.
- **Webmaster** at CSI, GITAM Student Branch.
 - Managed and directed technical and Web teams responsible for setting up the tech stack using Github Pages.
 - Designed and maintained the CSI GITAM official website.
 - Managed various workshops and technical events during the CSI fest.

CERTIFICATIONS

- SQL and PLSQL - Capability Development, TATA STEEL Ltd
- Responsive Web Design Certification - Freecodecamp
- Python for Everybody Specialisation - University of Michigan, Coursera

HOBBIES AND INTERESTS

- Playing sports like cricket and volleyball
- Bike riding and cycling
- Exploring new destinations
