

Aditi Nandy

FULLSTACK-DEVELOPER

✉ aditinandy2017@gmail.com ☎ 9583357202 🌐 <https://www.linkedin.com/in/aditi-nandy/>

Fullstack Developer with **3 years of experience** including internship, proficient in **Node.js, Angular, and Ionic**. Skilled in database management with **MongoDB and SQL**. Enthusiastic problem solver dedicated to continuous learning and growth in the IT field. Passionate about leveraging technical expertise to support individuals and organizations.

Experience

Ajatus | Full-stack

Aug 2021 - Sep 2024

- Analyze given tickets or client requirements into parts. Calculate estimations and due dates.
- Implement front-end frameworks (eg. Angular) to create interactive and **dynamic UI**.
- Create **API** according to the requirements and **manage DBs**.
- Integrate APIs with UI. After Completing one ticket it will send to the tester for testing purpose before delivering to client.
- Additionally, managed and wrote automated scripts for server XML file configuration.
- Managed payment gateway integration, including **Razorpay**.
- Modified an image processing script using **Python and TensorFlow** for enhanced performance and accuracy.

DBI360 | Full-stack

Sep 2024- present

- Contributed to an existing ERP project built on PHP and SQL, enhancing its functionality and performance through microservice architecture.
- Designed and developed **microservices using Node.js** to improve modularity and scalability of the ERP system.
- **Integrated Node.js APIs with a React frontend**, ensuring seamless data exchange and enhanced user experience across the application.
- **Managed and optimized SQL databases** to support the ERP application, ensuring efficient data retrieval and storage.

Education

BSc ITM

Utkal University | 2017 - 2020

- Information technology and management

MCA

BPUT | 2020 - 2022

- Computer Application & Development
- Percentage: 82%

Skills

- Programming Languages: **HTML, CSS, JS, Python**
- Front-End Technologies: **Angular, Ionic**
- Back-End Technologies: **Node.js, Express, Django, Nest.js**
- Databases: **MySQL, MongoDB**
- Version Control: **Git**
- Tools: **Visual Studio Code, Figma, Docusaurus, Bravo**
- Familiarity with: **APIs, Integrate Razorpay, Metabase**
- Security System: **JWT auth**
- Competitive Coding

Projects

● SIGEKO | Live URL: [<https://www.sigeko-in-der-region.de/>]

- In this project, I played a key role in the end-to-end development of a construction website using Angular, integrated with Node.js APIs and a SQL database. The website allows builders to register and enables users to hire, rate, and comment on builders, as well as shop for construction products. Additionally, I created a sitemap.xml file to store all dynamic URLs of the website.
- Technologies used: **Angular, Node.js, SQL, HTML, CSS**

● GRANT-MONITORING | Live URL: [<https://dev.ugms.hudd.in/>]

- In the project, I developed a website using Angular and integrated it with .NET APIs and PostgreSQL. The website includes dynamic data visualization features such as line graphs, pie charts, donut charts, and maps, all of which fetch data from the APIs and display it in real-time.
- Technologies used: **Angular, .NET, PostgreSQL, Chart.js**

● Recycle Pay | Available in Playstore and appstore

- Developed a scrap collection mobile application using Ionic framework, integrated with Express APIs and MongoDB database. The customer-facing app features a catalog of scrap items with their respective market values. Customers can book a collection slot by specifying the desired time, payment mode, payment details, pickup address, and the items they wish to sell as scrap. Our agents then arrive at the designated pickup location to collect the scrap, weigh it, and provide a QR code for payment. The transaction is processed by scanning the QR code using a scanner, which retrieves the customer's payment details for seamless processing.
- Technologies used: **Angular, Ionic, Node.js, MongoDB, Razorpay.**
