## Certification

- Certification : Python Developer
- Certified by : IT- ITeS SSC NASSCOM

## Technical Skills

- Programming languages : Python
- Cloud Computing Service : AWS
- Web Framework : Django , NumPy ,Pandas
- Database : MySQL
- Client side Technologies : HTML, CSS, JavaScript, JQuery, Bootstarp

## Project Details

### 1. Bot Chat Tool(2023-23)

**Technologies used:** Python, AWS(Lambda, Lex, Kendra, S3)

- Managed Amazon S3 bucket for efficient uploading and storage of data.
- Created indexes and data sources in Kendra search console for optimized search results.
- Implemented query-based interactions using Amazon Lex for a seamless user experience.
- Integrated Lambda functions to facilitate data processing and information retrieval, ensuring robust error handling for text or voice commands.

### 2. Course Management System(2022-23)

**Technologies used:** Python, Django, MySQL, HTML, CSS, Bootstrap, JQuery

- Developed a course management system allowing admins to create accounts for college students and faculties.
- Implemented functionality for admins to create course programs, add instructors, and assign students to courses.
- Designed core business logic of the application using Python, Django, and MVT Architecture.
- Integrated MySQL server to fetch course and faculty details, ensuring data consistency and reliability.
- Utilized HTML and CSS to design a seamless and user-friendly front-end web application.
- Provided users with the ability to register and log in securely, facilitating course enrollment and faculty booking.
