## PROFESSIONAL PORTFOLIO

Competent and experienced software engineer professional specialized in **Artificial Intelligence, Machine Learning** and **Data Engineering**, offering 6+ years of experience in design, development, testing, maintenance and documentation of scalable and robust application software products that meets the business requirements and expectations of end users. My passion for technology, coupled with my commitment to excellence, positions me as a valuable asset to any organization seeking a seasoned professional to drive innovation and success in software development.

## TECHNICAL CORE COMPETENCIES

|                             |                                                                                        |
|-----------------------------|----------------------------------------------------------------------------------------|
| Programming Languages:      | Python, SQL, C, R                                                                      |
| Database Technologies:      | MySQL, MongoDB                                                                         |
| Data Engineering/ETL Tools: | Apache Airflow                                                                         |
| AI/ML Technologies:         | OpenCV, NLP, NumPy, Pandas, TensorFlow, PyTorch, SciPy, Scikit-learn, Matplotlib, etc. |
| Cloud Platforms:            | AWS, Googe Cloud                                                                       |
| Web Technologies:           | HTML/CSS, JavaScript, PHP, Angular, React, Flask, etc.                                 |
| Version Control:            | Git, GitHub, GitLab, Bitbucket, etc.                                                   |
| IDE Tools:                  | VS Code, PyCharm, Jupyter Notebook                                                     |
| Mathematics Skills:         | Linear Algebra, Calculus, Probability & Statistics, Graph Theory, Set Theory, etc.     |
| Other Tools & Technologies: | Linux, Dart/Flutter, UML, OOP, Postman, JSON, MS-Office etc.                           |

## WORK EXPERIENCE

### Quocent

#### AI/ML Engineer

2021-Present

#### Domain: - Artificial Intelligence and Machine Learning

- Design, develop, train and implement machine learning models using suitable algorithms based on data and business requirements in **Python** and deploy the ML models in production environment.
- Identify and extract relevant features from the data to improve model performance.
- Evaluate the performance of machine learning models using appropriate metrics and conduct rigorous testing to ensure the robustness and reliability of the models.

- Implement detections and predictions such as object detection, face detection and recognition and intrusion detections in a video streaming from a RTSP camera using **OpenCV** in python and log the detection outputs in database.
- Detect and extract text from various sources like images, documents, videos and scanned files using **EasyOCR** in python.
- Design and develop scalable, responsive and cross platform AI driven mobile applications for both Android and IOS using **Flutter** and deploy them into play store .

## Evaya Data Systems

### *Software Development Engineer*

2018 – 2021

#### **Domain: - Data Engineering and ETL Automation**

- Design and build normalized ER Data models, database schemas, tables and data warehouse architectures and process optimized queries on data in **MySQL**.
- Write and automate **Python** codes and design and implement low-latency, high-availability, and performant applications using Python frameworks.
- Implement data validation and cleansing process to ensure data quality and ensure security measures to protect sensitive data
- Implement, optimize and automate **ETL** data pipelines that extract data from various external sources, transform data based on business requirements and load data into target data warehouses using **Airflow**.
- Create, configure and manage **AWS S3** buckets to store and organize data.
- Facilitate upload and download of data to and from AWS S3 buckets and optimize data transfer processes for efficiency.

## Wipro Technologies

### *Project Engineer*

2015 – 2018

#### **Domain: - Network & Linux administration**

- Install and configure **Linux** operating systems on servers and workstations.
- Create and manage user accounts and groups and implement user access controls and permissions.
- Configure and manage network interfaces, troubleshoot network connectivity issues and implement and manage firewall rules.
- Automate routine administrative tasks to improve efficiency and reduce manual errors using **Bash** shell script and **Python**.

## EDUCATION

## Utkal University, Bhubaneswar

### **5 Years Integrated Masters In Computer Application - 2015**

#### **Specialization - Computer Science**

Percentage- 82.0%

**Mothers Public School, Bhubaneswar**

**XII-CBSE - 2010**

**Specialization- Science**

Percentage-72.0%

**DAV Public School Chandrasekharpur, Bhubaneswar**

**X-CBSE - 2008**

Percentage- 80.0%

**CERTIFICATIONS** 

- ✓ Master Computer Vision™ OpenCV4 in Python with Deep Learning
- ✓ Machine Learning Algorithms: Basics to Advanced
- ✓ The Data Science Course: Complete Data Science Bootcamp 2024
- ✓ Ultimate AWS Certified Cloud Practitioner CLF-C02
- ✓ Red Hat Linux Certified

**SOFT SKILLS** 

- ✓ Team management and collaboration
- ✓ Leadership
- ✓ Dedicated and Flexible
- ✓ Thinking outside the box
- ✓ Logical thinking and problem solving
- ✓ Ability and desire to learn
- ✓ Meeting deadlines

**LANGUAGES** 

- English
- Hindi
- Odia
