
ANURAG PATTNAIK

Bhubaneswar, Odisha, India ✉ anuragpattnaik2010@gmail.com ☎ 8763382699 🌐 www.linkedin.com/in/anurag-pattnaik-39298496 🏠 <https://anuragpattnaik2010.wixsite.com/aboutanurag>

SUMMARY

Experienced software development engineer focused on data engineering, artificial intelligence & machine learning with a proven track record of delivering high-quality, scalable solutions across diverse industries. Proficient in full-stack development, agile methodologies, and leading cross-functional teams to successful project completion. Strong expertise in designing, implementing, and optimizing complex software systems to meet business objectives and exceed client expectations.

EXPERIENCE

Software Engineer- AI/ML

Quocent Technologies Private Ltd

November 2021 – June 2023, Bhubaneswar

- Designed, developed, trained and implemented machine learning models using suitable algorithms based on data and business requirements in Python and deploy the ML models in production environment.
- Implemented detections and predictions such as object detection, face detection and recognition and intrusion detections in a video streaming from a RTSP camera using OpenCV in python and log the detection outputs in database.
- Designed and developed scalable, responsive and cross platform AI driven mobile applications for both Android and IOS using Flutter and deploy them into play store.
- Engineered a machine learning model that improved predictive accuracy by 25%, by integrating multi-source data, fine-tuning hyperparameters, and employing neural network algorithms using TensorFlow and Python.

Software Development Engineer- Data Engineering

Evaya Data Systems

September 2018 - January 2021, Bhubaneswar

- Designed and implemented a multi-terabyte data warehouse solution that consolidated data from multiple sources, improving query response times by 50% and supporting critical business intelligence decisions.
- Designed and build normalized ER Data models, database schemas, tables and data warehouse architectures and process optimized queries on data in MySQL.
- Implemented, optimized and automated ETL data pipelines that extract data from various external sources such as databases, data lakes, APIs, logs, csv or excel files, transform data based on business requirements which involves cleaning, filtering, aggregating, joining, or enriching data sets using tools like

Apache Spark or custom scripts and load data into target data warehouses or data marts using Apache Airflow.

- Created, configured and managed AWS S3 buckets to store and organize data , facilitate upload and download of data to and from AWS S3 buckets and optimize data transfer processes for efficiency.

Project Engineer

Wipro

September 2015 - December 2016, Bangalore

- Installed and configured Linux operating systems on servers and workstations.
- Created and managed user accounts and groups and implement user access controls and permissions.
- Configured and managed network interfaces, troubleshoot network connectivity issues and implement and manage firewall rules.
- Automated routine administrative tasks to improve efficiency and reduce manual errors using Bash shell script and Python.
- Designed and implemented database, which includes setting up database servers, configuring database management systems, creating database instances, and ensuring proper data migration from existing systems, if applicable.
- Monitored and optimized the performance of databases that includes tuning queries, optimizing data storage and retrieval, and fine-tuning database configurations to improve efficiency and response times.

EDUCATION

5 Years Integrated Masters Of Computer Application

Utkal University • Bhubaneswar, Khordha, Odisha, IND • 2015 • Percentage - 82%

12TH- Science

Mothers Public School, CBSE • Bhubaneswar, Khordha, Odisha, IND • 2010 • Percentage - 72%

10TH

DAV Public School, Chandrasekharapur, CBSE • Bhubaneswar, Khordha, Odisha, IND • 2008 • Percentage - 80%

SKILLS

Technical Skills: - Java, Python - Django, Flask, NumPy, Pandas, Matplotlib, Scikit-Learn, OpenCV, NLP, TensorFlow, PyTorch, Apache Airflow, Linux, HTML/CSS, JavaScript-Angular,React,NodeJs, Database - MySQL, MongoDB, Big Data, ERD, Version Control- Git, Bitbucket, Cloud-AWS, GCP

Domain Expertise: - Object Oriented Programming, Software Engineering, Data Engineering & Analytics, Application Development, Artificial Intelligence & Machine Learning

Software Tools & IDE: - VS Code, PyCharm, NetBeans, Jupyter Notebook, Canvas, Postman, Visual Paradigm for UML, Lucidchart

Soft Skills: - Team management and collaboration, Project Management, Leadership, Dedicated and Flexible, Thinking outside the box, Logical thinking and problem solving, Ability and desire to learn, Meeting deadlines
