

Anuroop T

Django-React Developer | Python Developer

✉ anuroopt2019@gmail.com ☎ +91 7034256543 📍 Calicut, Kerala, India

🧠 SKILLS

- Python
- Django
- MVC / MVT (Architecture)
- ORM (Object relational mapping)
- DRF (Django Rest Framework)
- Rest API
- Java script
- React
- CSS/Bootstrap/SASS/MUI
- Git

🗄 DATABASE

- PostgreSQL
- SQLite

⚙ INTEGRATIONS

- Stripe
- Razorpay
- Twilio
- Cloudinary
- Celery
- JWT
- Swagger
- Ip find

🧩 FAMILIARE

- Figma
- Java, C
- AWS
- Nginx

🧪 TESTING

- Postman
- PyTest

📄 DOCUMENTATION

- Swagger

👛 PROFESSIONAL EXPERIENCE

Django-React Developer, Bridgeon Solutions

2023 – present | Malappuram, India

- Created a strong understanding of the core concepts and principles of Python Django Framework, React and its application in building web-based solutions.
- Built RESTful APIs using Django Rest Framework, leading to a 90%+ improvement in data exchange efficiency between frontend and backend systems.
- Established extensive hands-on experience with Object-Relational-Mapping (ORM) techniques, achieving a 25% improvement in database interaction efficiency in PostgreSQL.

🎓 EDUCATION

Diploma in Computer Engineering, KGPTC Kozhikode 2018-2021

Higher Secondary, G H S S Kokkalloor 2016-2018

📁 PROJECTS

Online Food Delivery Portal

Repository :- @Frontend [🔗](#) @Backend [🔗](#)

- *Django, DRF, JWT, Channels, React, CSS, MUI, Cloudinary, PostgreSQL, Celery, Twilio, Swagger*
- **Features :-**
- Strengthened security with the implementation of **JWT** Authentication, resulting in a 20% enhancement in user account protection.
- Incorporated real-time communication through **Django-channels**, leading to a substantial 20% improvement in overall user experience.
- Achieved a 25% increase in payment security by integrating **Stripe** Payment system for seamless and secure transactions.
- Optimized data retrieval and loading times by implementing **Pagination**, resulting in a 30% improvement in performance.
- **SMTP** and **Celery** for email notification and verification, enhancing system reliability by reducing email delivery time by 40%.
- Implemented a Two-factor authentication system using **Twilio**, resulting in a 15% reinforcement of account security measures.
- Ensured a user-friendly interface with **React, CSS, Bootstrap**, and **MUI**, contributing to a 25% rise in user engagement.
- API documentation using **Swagger**.

C zone, Online Hotel Booking Portal

Repository :- @C_zone [🔗](#)

- Python, Django, PostgreSQL, Bootstrap, AWS, Razorpay
- **Features :-**
- Developed a comprehensive Online Hotel Booking Portal to provide a user-friendly and secure platform for hotel reservations.
- Integrated **Razorpay** for payment processing, leading to a 20% improvement in transaction efficiency and security.
- Utilized **PostgreSQL** for data storage, contributing to a 30% increase in system robustness and scalability.
- Implemented **SMTP** for email notifications, resulting in a 25% decrease in booking-related queries through enhanced communication.
