

Ashis Kumar Mohanty

Passionate Software Developer with Strong Coding Skills and a Desire to Learn and Grow. Recent Graduate in CSE with Skills Seeking Entry-Level Opportunities.

As a recent graduate with a degree in B.Tech computer science, I am eager to launch my career and apply my skills and knowledge to make a meaningful contribution in Software Development. During my academic years, I had the opportunity to develop my skills in java and python and coding through various projects, and coursework. I am confident that these experiences have prepared me well for a career in Software Development. My passion for Software Development drives me to continuously learn and stay up-to-date on industry trends and best practices.

EDUCATION

10th

Janashakti High School, Pentha.

03/2015 - 04/2016

Kendrapara, India

12th in Science

Chitrotpala College, Akhua-Odana.

05/2016 - 05/2018

Kendrapara, India

Diploma in Computer Science

PNS School of Engineering & Technology, Marshaghi.

06/2018 - 09/2020

Kendrapara, India

B.Tech in Computer Science

Modern Institute Of Technology & Management.

11/2020 - 07/2024

Bhubaneswer, India

PERSONAL PROJECTS

Weather App

- A weather app leverages the Open Weather Map API to provide real-time weather information. Users input a city, and the app retrieves data, displaying current conditions including temperature and description. The script handles exceptions and notifies users if the city is not found.

Stock Price Analysis

- Use pandas to fetch and analyze historical stock price data, calculate moving averages, and generate trading signals.

Robo Speaker

- A "Robo Speaker" project involves creating a robot capable of speech synthesis. It employs text-to-speech (TTS) libraries like gTTS or pyttsx3 to convert text input into spoken words. Users can interact with the robot by sending text messages or commands via a user interface or a chatbot-like interface. The project combines natural language processing (NLP) techniques to understand user inputs, and the robot responds by vocalizing the generated text.

Sales Data Analysis

- This project involves analyzing a company's sales data to uncover trends, patterns, and insights that can help in decision-making.
- Skills used:** Data cleaning and preprocessing, Exploratory Data Analysis (EDA), Data visualization, Statistical analysis

Financial Data Analysis

- Analyzing financial data to provide insights on company performance, investment opportunities, and market trends.
- Skills used:** Data cleaning and preprocessing, Time series analysis, Financial metrics calculation, Data visualization
