

Ashribad Biswal
Test Engineer ,HCL Tech ,Bangalore
[Email- ashribadbiswal1@gmail.com](mailto:ashribadbiswal1@gmail.com)
Cell No :- +91 – 8310949189

SKILLS:

Python | Pytest | Robot | Selenium | Playwright | SQL | Unix | API Testing | Rest API Testing | AWS –Cloud | UI Testing | Agile | Docker | Git | Jenkins | Jira | RestFul Web Service | Json

Domain expertise : Mediation , Telecommunications-BSS. Siebel CRM, Banking :- ACH,PCI DSS, KYC, AML TPS and Online Banking.

OBJECTIVE:

With the main objective being towards satisfaction, both for myself and the company, I strive to work towards the high standards of loyalty and dedication which has been consistent throughout, thereby making work a pleasure.

EXPERIENCE SUMMARY:

- As a Software Test Analyst – Worked on various industry verticals/Component – **Mediation , Telecommunications-BSS. Siebel CRM, Banking :- ACH,PCI DSS, KYC, AML TPS and Online Banking.**
- 3 years of experience in Quality Assurance in Information Technology, involving analysis, both Functional and **UI and API** testing of client server and web applications.
- Proficient in designing and implementing automated test scripts using tools like **Selenium and Playwright.**
- Experience in testing web and mobile applications across various browsers and devices.
- Extensive experience in API testing using tools like Postman, RestAssured, and Request.
- Adept at writing automated test scripts for RESTful and SOAP services, ensuring API functionality, reliability, and security.Knowledge of scripting languages like **Python, Java, JavaScript, and Shell scripting.**
- Expertise in integrating UI automation tests with CI/CD pipelines using Jenkins, GitLab CI.
- Expertise in creating **Agile Test Plans, Test Cases, Test Scenarios**, Defect Management to ensure Quality Assurance and to test all the business requirements.
- Actively involved in **Review test case** and preparing **Traceability matrix.**
- Execute the Test case to validate functionality .
- Very good experience in **Functional, Regression** Testing.
- Strong understanding of **Agile methodologies (Scrum)** and active participation in sprint planning, daily stand-ups, and retrospectives.
- Experience in working closely with development, QA, and operations teams to ensure high-quality software delivery.
- Using **Unix** commands run the billing Jobs and validate the response log file
- Strong knowledge of Software Development Life Cycle and Software Testing Life Cycle.

TECHNICAL SKILLS:

Operating System	:-	Windows10,11 Ununtu, Linux
Programming Languages	:-	Python, SQL
Frameworks	:-	Pytest and Robot
Databases	:-	MySQL, PostgreSQL, SQLite
DevOps Tools	:-	Docker, Jenkins, Git,
Web Technologies	:-	HTML, CSS, JavaScript, RESTful APIs
Other Tools	:-	JIRA, Confluence, VS Code, PyCharm
SDLC	:-	Agile, Scrum, Waterfall

AWARDS AND ACHIVEMENTS:

- Rewarded with **Excellency award** from **Bell Mobility** for **Brilliant performance**.

EDUCATIONAL QUALIFICATION:

- Completed BTECH from Biju Patnaik University of Technology ODISHA With 68% in 2017 .

PROFESSIONAL EXPERIENCE SUMMARY:

- Working as a **Software test Engineer** with **HCL Tech ,Bangalore** from 5th July 2021 to 12th June 2024.

Project Sequence 1:

Title : **Inteligent Charging System (Oct 2023 – June 2024)**

System : Telecom Billing- BSS Mediation

Client : Bell Mobility.Canada

Technology&Tool : Python, Selenium, Pytest, Robot, GIT, Docker, Jenkins, Postaman, API, Rest API, Data Testing, UI Testing

Project Detail Description:

Convergent Charging System is an application that integrates all aspects of the customer relationship lifecycle for Communications Services Providers- Telfort Billing system. Telfort CCS delivers the next generation of convergent services, supporting session and event-based charging with or without unit reservation. Built around the 3GPP specifications, the system supports multiple monetary and non-monetary balances (buckets), which can be shared within a hierarchical structure or between unrelated services. Telfort CCS allows operators to perform real-time authorisation, accounting and policy control during service delivery, with a fully compliant Diameter interface for integration with the network and upstream application platforms.

This system consists various components OCF, ABMF, CDF, CGF, RF

Operation and Responsibilities :

- Collaborate with business analysts, developers, and stakeholders to understand the functional and non-functional requirements of the BSS applications.
- Review and analyze technical specifications and design documents to ensure a thorough understanding of the system.Analyze and understand the ETL work flows developed
- Develop comprehensive test plans that outline the scope, objectives, resources, and schedule of the testing activities.
- Identify and prioritize test scenarios and test cases based on business requirements and risk analysis.
- Design, develop, and maintain robust and scalable test automation frameworks for UI and API testing using tools like Selenium, Appium, RestAssured, and Postman.
- Create and execute automated test scripts for web and mobile BSS applications to verify UI functionality, performance, and user experience.
- Perform cross-browser and cross-device testing to ensure compatibility and responsiveness.
- Integrate UI automation tests into the CI/CD pipeline to enable continuous testing
- Develop and execute automated test scripts for RESTful and SOAP APIs to validate their functionality, reliability, and security.
- Perform API testing for various operations such as CRUD (Create, Read, Update, Delete), authentication, and data validation.
- Use tools like Postman, SoapUI, and RestAssured to create automated test suites and integrate them into the CI/CD pipeline.
- Execute automated test suites and analyze the results to identify any issues or discrepancies.
- Generate and share detailed test reports with the team, highlighting test coverage, test execution status, and defect metrics. Continuously monitor and optimize test execution times and resource usage.

Project Sequence 2:

Project Name :- Smart Mediation (March 2022 – Sept 2023)

Client :- Bell Mobility.Canada

Technology&Tool : Python, Selenium, Pytest, Robot, GIT, Docker, Jenkins, Postaman, API, Rest API, Data Testing, UI Testing

Project Detail Description :

This solution provides a mechanism that Integrating Telecom CDR and Customer Data from Different Operational databases and Data warehouses into a Central Data Warehouse for Business Analysis. Abstract— Mining operational telecom data has given many interesting insights about customer behavior, mobility, social interaction etc and has great business value. But to have truly unbiased analysis over a defined geographic region, we need to first consolidate all telecom data from many different operators present within the region and then analyze them. This necessitates an integration architecture that will allow to integrate, consolidate and store different type of operational telecom data such as call detail record (CDR), customer relationship management (CRM) data, network data etc into a central data warehouse (DW). Though almost all operator stores semantically same type of data but in a little different form and format. Again these operators are separate business entities so integrating data from their operational databases and data marts needs to be independent of each other and flexible in fetching data for extract, transform and loading processes.

Project Sequence 3:

Project Name :- CIBC -Investment Banking (July 2021- March 2022)

Client :- Canadian Imperial Bank of Commerce, Canada

System :- Banking

Project Detail Description : CIBC's wholesale banking business works with domestic and international organizations looking for a banking relationship that combines in-depth industry knowledge with comprehensive capital markets, corporate banking and investment banking capabilities to address their most pressing needs. We strive to forge strong and deep relationships with our clients to understand the demands of their business and bring distinctive and appropriate solutions to the table. •Organizations looking to expand, diversify or restructure their operations know they can rely on us for in-depth advice, market-leading M&A experience and extensive capital-raising services to help them meet their business needs. • CIBC bring together the deep resources of a global investment bank to tailor a set of solutions that address your short- and long-term strategic and financial objectives. With an intimate knowledge of capital markets and industry verticals, our seasoned professionals located in North America, Europe, Asia and Australia are committed to delivering a best-in- class client experience. • Our global M&A practice can provide financial advice and execution support for your most complex transactions. We can arrange financing for equities and equity-linked securities, including initial public offerings, follow-on equity issues, convertible issues, preferred shares and private placements. In addition, CIBC have extensive expertise in originating public debt offerings, medium term notes, private placements and structured notes. You can also gain ready access to a range of lending products to finance your ongoing activities and capitalize on market opportunities.

PERSONAL DETAILS:

Name	Ashribad Biswal
Current Location	Bangalore
Contact Numbers	(+91) 8310949189
Nationality	Indian
Marital Status	Married

DECLARATION:

I, Ashribad Biswal hereby declare that the information is true and correct to the best of my knowledge and belief.
