

## Summary

Business Intelligence Developer With Experience In **Power BI**, **Dax** and **SQL**. Proficient In **Data Modeling**, **Power Query**, and **Integrating Diverse Data Sources**. Experienced In **Machine Learning**, Specializing In **Classification** and **Regression** For **Time Series Forecasting**. Skilled at Delivering Actionable Insights Across Sales, Retail ,Inventory, Agricultural and Banking, With Expertise In **Data Governance** and **ETL** Processes.

## Skills

## Experience

### Shreeji Data Analytics

Business Intelligence Developer

Oct 2023 - Present

Ahmedabad, Gujarat

- Developed **Power BI dashboards** by collaborating with cross-functional teams, utilizing diverse data sources, including **on-premise** and **cloud sources** such as **Azure SQL**, **MS SQL**, **Parquet**, **SharePoint**, and **Dynamics 365 Business Central**, as well as file-based sources like Excel and CSV. Covered sales, inventory, banking, agriculture, and retail domains.
- Designed advanced **DAX** formulas, **dynamic measures**, and **time intelligence functions** for insightful reporting.
- Built optimized **data models** in **Power BI** and utilized **Power Query** and **Dataflow Gen 2** to streamline data transformation and enhance performance.
- Managed **Power BI Service** tasks, including **scheduled refreshes**, **data gateways**, and **Row-Level Security (RLS)** to ensure secure data access and efficient updates.
- Optimized **ETL** processes with **SQL Server**, utilizing **query folding** to improve data consistency and performance.
- Leveraged **machine learning techniques**, including **XGBoost** and **random forest**, to improve **credit risk models**, boosting **prediction accuracy by 20%** and improving **risk management** in the **insurance domain**.
- Enhanced **Time series forecasting** models using **Facebook Prophet**, improving forecasting accuracy by **15%** and optimizing inventory and sales planning for retail clients.
- Ensured data accuracy using **Excel** functions (**Xlookup**, **Vlookup**) and developed **web scraping** solutions with **Python** to streamline data collection and analysis.

### Statskew Techs

Data Analyst Intern

Mar 2023 - Mar 2023

Remote

- Implemented **Python** to analyze the social media website data like likes, impressions, clicks, and engagements to extract actionable insights.
- Utilized **Ms-Excel** to organize and visualize data by creating **dashboards**, including device, region, and age info/details, to facilitate data-driven decision making.

## Yoshops.com

### Data Analyst Intern

Nov 2022 - Jan 2023

Chennai , TamilNadu

- Worked with **Power BI**, as well as **Ms-Excel**, using retail and e-commerce domain datasets by understanding the requirements.
- Performed data connectivity to the data sources, **data cleansing**, data transformation, and web scraping steps on the large complex raw dataset to examine and visualize, as well as creating dashboards to explore the targeted key insights.

## Education

### Centurion University of Technology and Management

B.TECH - Computer Science Engineering, CGPA: 7.95

Bhubaneswar, Odisha

Jun 2023
