SUMMARY

Highly skilled and motivated Python developer with two years of professional experience in designing, implementing, and maintaining robust software solutions. Proficient in utilizing Python and related frameworks such as Django to develop efficient and scalable web applications. Possess a solid understanding of software development principles, data structures, and algorithms. Proven ability to adapt quickly to new technologies and contribute to the success of innovative projects. Excited to leverage my expertise in Python development to contribute to the success of dynamic and challenging projects.

PROFESSIONAL EXPERIENCE

Senior Analyst 2022 - Present
Capgemini Noida

- Over the course of my professional journey, I embarked on a learning path to Python and Django, a powerful web framework.
- I honed my skills through hands-on coding exercises and actively participated in the vibrant Python communities, staying abreast of best practices and emerging trends.
- Applied this knowledge in practical settings by spearheading the development of several impactful projects. Noteworthy among these projects are NTI and RFM, where I leveraged Django's robust features to build a scalable and efficient web application.
- Worked on sprints by prioritising tasks based on impact analysis, feasibility study and effort estimations

PROJECTS

New Technology Introduction(NTI)

- Worked on New Technology Introduction (NTI) application which is developed to track all NTI projects. NTI Management Tool can be used to run metrics, monitor the budget, check progress for inflight projects.
- Responsible for creating Admin module which handles all the User records, the role of every user in the application with their information and the projects they have created.
- Worked in close collaborations with client team to meet business requirements.

Restaurant Management System(RFM)

- Developed and implemented a comprehensive Restaurant Management System using Python and Django, featuring advanced functionalities such as order processing, menu management, and inventory tracking for Mcdonald's.
- Designed and optimized the database schema for efficient data storage and retrieval.

E-Commerce Website

- Contributed to the development of an E-commerce website, leveraging my expertise in web development technologies. Key highlights include designing and implementing user-friendly interfaces using HTML, CSS, and JavaScript, with a focus on responsive design principles.
- Utilized a backend framework, such as Django, to handle dynamic content, user authentication, and database interactions. Integrated secure payment gateways for seamless online transactions and implemented advanced features.

EDUCATION

B-Tech in Electronics and Communication 2017 - 2021
ABES Engineering College
GPA | 7.45 / 10

SKILLS

Python · SQL · Django · JavaScript ·
HTML · .NET

Operating Systems

Linux · Windows

TRAINING/COURSES

✓ Data Structure and Algorithms
Geeks For Geeks

✓ Python Certification
Coursera

ACHIEVEMENTS

Awarded with the best performer of the quarter for NTI Project in Capgemini

Secured 3rd rank in Capgemini Training

STRENGTHS

★ Team Working Abilities
Received performer of the quarter in NTI Project for my involvement in the team

★ Excellent Communication Skills
Volunteered in the CSR team for Amadeus, organized tuition platforms for the underprivileged. Designed confluence page for book drives, etc.
