

BIJAY MAHAPATRA

+91 7854894856 bijaymahapatra2002@gmail.com www.linkedin.com/in/bijay-mahapatra2002

EDUCATION

Trident Academy Of Creative Technology

Degree Name- Master in Computer Application(MCA), **CGPA-8.45**

2023-2025

Bhubaneswar,Odisha

Model degree college

Graduation-Bsc(Physics) , **Percentage-78%**

2020-2023

Nayagarh,Odisha

TECHNICAL SKILLS

Programming Languages: C , Java , Python

Web Technologies: HTML , CSS , Basic of PHP, ML(Basics)

FrameWorks: Django

Database Management: Sqlite , Sql , MySql

Other Skills: Verbal Communication , MS Office

PROJECTS

Project Name: Office Employee Management System (Django Framework).

- About Project: Designed and developed a web-based employee management system using Python and Django. The application includes features to add, view, update, and delete employee records, along with integrated search and filter options for dynamic data retrieval. Utilized Django's ORM for secure and efficient database interactions and implemented a responsive user interface using HTML, CSS, and Bootstrap. The project was deployed on a local server for demonstration and testing, showcasing a scalable and maintainable codebase adhering to Django's Model-View-Template (MVT) architecture.

Project Name: Iris Flower Classification using Machine Learning.

- About Project: Developed a machine learning model in Python to classify iris flowers into species using K-Nearest Neighbors (KNN), Support Vector Machine (SVM), or Decision Trees. Applied data preprocessing, visualizations, and performance tuning for accuracy.

Project Name: Covid-19 Detection using Machine Learning.

- About Project: This project is a web-based application built using Python, Django and PostgreSQL . It implements machine learning models to predict the likelihood of COVID-19 infection based on user-provided symptoms and medical history. The dataset is preprocessed to handle categorical data and missing values. Multiple algorithms like **K-Nearest Neighbors (KNN)**, **Logistic Regression**, **Naive Bayes**, and **Decision Tree** are used for prediction, and their accuracies are compared visually using **Matplotlib**. The application also allows users to input real-time data and obtain predictions based on the trained Logistic Regression model.

EXPERIENCE

Company Name: PYTHONSOFT(Software Training Company)

Training

- Machine Learning with Python
- Gained proficiency in python programming.
- Hands-on experience with machine learning concepts and implementation.
- Learned data preprocessing, model building, and evaluation techniques.

CERTIFICATIONS

- Python Industry Oriented Training: TACT
- Smart India Hackathon: TACT

EXTRACURRICULARS

- Participated in Smart India Hackathon held on Trident Academy OF Creative Technology Bhubaneswar.
- Volunteer at Technical Workshops: Assisted in organizing Python and Machine Learning workshops for beginners.
- Participated in Coding Competitions: Competed in inter-college and online programming contests to solve real-world problems.
