PROFILE SUMMARY

Targeting **Full Stack Developer** with expertise in Python and modern web technologies, seeking challenging opportunities to build innovative solutions for a forward-thinking organization. Expert in developing scalable web applications using **Django**, **React.js**, and industry standard databases. Demonstrated track record of delivering end-to-end web solutions, from requirement analysis to deployment and maintenance.

EDUCATION

Siddhartha Educational Academy group of institutions

June 2020 – May 2024

Computer science and engineering , **CGPA:7.45**

Projects

Django Ecommerce Website Python, Django, Bootstrap, PythonAnywhere

June 2023 – Dec 2023

- Built a robust e-commerce platform using Python Django that incorporated secure user authentication, email verification for new accounts, enhanced security measures leading to zero data breaches during the testing phase.
- Designed essential e-commerce functionalities, including product browsing, category filters, and advanced cart systems which improved user experience and engagement. Established a live deployment of the project on PythonAnywhere, featuring seamless integration with existing systems, contributing to a more robust final product.
- Using a full stack technology, including Python, HTML, CSS, JavaScript, and SQLite, optimizing the user interface for seamless browsing and purchase flow across devices.

Full-Stack Chat Application Python, Django, sqllite, Django channels

feb 2024 - may 2024

- Engineered a real-time chat application using Django and React.js, implementing WebSocket connections through Django Channels to enable instantaneous message delivery and user status updates
- Architected a responsive front-end interface in React.js with real-time features including typing indicators and online/offline status, enhancing user engagement. Implemented token-based authentication system using Django REST framework, ensuring secure user sessions and data privacy.
- Leveraged a modern tech stack, including Django, React.js, WebSockets, and PostgreSQL, to ensure seamless real-time communication and efficient data handling. Developed user management system with profile customization features, including dynamic profile picture generation and user status tracking.

TECHNICAL SKILLS

Technologies: Python, SQL, JavaScript

Tools/Frameworks : Django, React.Js, HTML/CSS, Bootstrap, Tailwind, Vscod, REST API

DataBases : Mysql

ACADEMIC ACHIEVEMENTS

- Built a real-time chat application supporting 50+ concurrent users with features like message persistence and read receipts, reducing message delivery latency to under 100ms.
- Developed and deployed a full-stack e-commerce website using Django and React.js, handling 500+ daily users.

CERTIFICATIONS

cloud computing certificate issued by NPTEL

jan - april 2023

SOFT SKILLS

- Problem-solving, Critical thinking, Collaboration , Time management , Adaptability.
