SOFTWARE AUTOMATION TEST ENGINEER

Dedicated Software Automation Test Engineer proficient in developing and maintaining automated testing solutions. Known for a collaborative approach and the ability to inspire teams to achieve excellence. Committed to continuous learning and eager to contribute to innovative projects that shape the future of technology. Skilled in creating robust test plans, executing comprehensive test cases, and ensuring the highest standards of software quality and reliability.

KEY COMPETENCIES

- Test Automation Tools:** Selenium, JUnit, TestNG, Appium, Cucumber
 - CI/CD Tools:** Jenkins, Git, Docker
 - Version Controls/Project Management tools:** Git(Gitlab/ Github), Jira
 - Programming Languages:** Java
 - Cloud Platforms:** AWS
 - Performance Testing Tools:** JMeter, LoadRunner
 - Other Tools:** Postman, REST Assured, Maven
 - Soft Skills:** Critical thinking, Problem solving, Communication.
-

PROFESSIONAL EXPERIENCE

Ajatus Software, Bhubaneswar **Software Automation Test Engineer**

Dec 2022 - Present

Worked as a Software Automation Test Engineer at Ajatus, leveraging extensive expertise in frontend and Android app testing. Proficient in developing and maintaining automated test suites using industry-standard tools such as Selenium, JUnit, and Appium. Known for creating detailed test plans, executing comprehensive test cases, and identifying potential issues early in the development process to ensure high-quality software delivery

Accomplishments:

- Developed and maintained scalable and robust automation frameworks to enhance the efficiency and accuracy of the testing process.
- Actively engaged in Agile methodologies, including sprint planning, daily stand-ups, and retrospectives, ensuring seamless integration of testing activities within the development cycle.
- Successfully led a cross-functional team of testers and developers to achieve project goals within tight deadlines, ensuring seamless coordination and efficient delivery of high-quality software.
- Recognized as "Improver of the Month" multiple times for consistently delivering high-quality work and driving continuous improvement initiatives within the testing team.
- Managed version control systems to effectively track and maintain project progress.
- Deployed and maintained test environments on servers, ensuring optimal performance, security, and reliability for uninterrupted testing operations.
- Monitored test environments and resolved issues promptly to minimize downtime and ensure smooth operation
- Optimized performance and scalability of test suites, significantly reducing test execution times and improving overall user experience.
- Collaborated closely with developers, product owners, and other stakeholders to define test requirements and acceptance criteria

PROJECTS

Recycle Pay

Project Type: Marketplace Platform | Environment: Frontend - React | Backend - Node | Database - MongoDB | Mobile APP - Angular (Ionic)

Role & Responsibilities:

- Assign tasks and responsibilities to team members based on their skills and expertise, ensuring optimal utilization of resources
- Develop detailed project plans, including timelines, milestones, and resource allocation to ensure timely and within-budget delivery of the software
- Work closely with the development team to create comprehensive technical specifications and design documents
- Utilize automation tools to design, develop, and execute automated test scripts, ensuring efficient and effective testing processes
- Evaluate and select appropriate automation tools and technologies that align with the project requirements (e.g., Selenium, Appium, JUnit, TestNG, etc.).

GIOVANI FABRICS (Bangkok)

Project Type: ERP (Enterprise Resource Planning) | Environment: Frontend - Bootstrap, HTML, CSS | Backend - PHP Yii2 | Database - PostgreSQL (PgSQL) | Mobile APP - Angular (Ionic)

Role & Responsibilities:

- Developed comprehensive test plans and strategies for ERP modules, ensuring alignment with project requirements and objectives.
- Conducted GUI and functional testing using black box testing techniques
- Designed and implemented an automation framework using Selenium WebDriver, TestNG, and Cucumber, optimizing test coverage and efficiency.
- Created and maintained requirement traceability matrices to ensure end-to-end test coverage and traceability
- Identified, documented, and tracked defects using GitLab, ensuring timely resolution and effective communication with development teams
- Conducted performance and scalability testing to assess system behavior under different load conditions

EDUCATION

Gandhi Engineering College

2015 - 2019

Graduate **Btech** in **Mechanical Engineering**

Gayatri +2 Science Residential College

2013 - 2015

Higher Secondary School(+2)

Sri Aurobindo Integral Education Centre

2012 - 2013

Secondary School(10th)

Hobbies : Travelling, Fitness Addict , Playing Cricket, Playing Mob or Pc game,Gardening.

Languages : English, Hindi,Odia.
