SUMMARY

Experienced Software Developer with over 2.8+ years of proficiency in Python. Demonstrated expertise in designing, developing, debugging, and deploying scalable web applications. Known for strong problem-solving and analytical skills, with a track record of delivering high-quality solutions. An excellent communicator and collaborative team player adept at working in dynamic environments.

Technical Skills

Languages and DataBases: Python, Linux, JavaScript, Django, Pandas, Numpy, SQL, MySQL, Docker, Jinja, PostgreSQL

Tools: Git & GitHub, Power BI, JIRA, VS Code, Swagger, Confluence

Concepts: OOP, ORM, PDB, PyQt, Agile

Other Skills: Advanced Excel, Business Analysis, Data Analysis, Customer Acquisition, Teamwork, Leadership, Adaptability

Experience/Projects

Technicolor Group

June 2022 – Present

Junior Software Developer

Bengaluru, India

- Designed and developed custom VFX software and tools using Python, enhancing the efficiency and capabilities of the production pipeline.
- Collaborated with the R&D team to research and implement new technologies, pushing the boundaries of visual effects.
- Collaborated **closely with VFX artists to understand workflow** requirements and provided tailored software solutions to enhance efficiency and productivity.
- Integrated **new Python-based tools into pipelines**, ensuring seamless operation and optimized performance.
- Successfully resolved **software issues**, ensuring minimal disruptions to the VFX production workflow and providing timely technical support to artists, **production Support**.
- Implemented and managed version control systems, such as Git, to track changes and maintain a stable and organized development environment
- Developed Python scripts that automated complex tasks, **reducing manual effort by 50%**. Created a Python-based rendering tool that **improved render speeds by 30%** while maintaining high visual quality.
- Technologies/Tools used: **Python, Linux, Git & GitHub, PyQt, MEL, Maya, Houdini, Nuke, algorithms, data structures**

Besant Technologies

Nov 2021 – May 2022

Full stack Intern

Bengaluru, India

- Developed and maintained web applications using **Python (Django) for back-end** and JavaScript(react) for front-end.
- Assisted in designing RESTful APIs and integrating them with front-end components.
- Collaborated with the development team to **build and deploy features and enhancement**.
- Wrote and optimized SQL queries for MySQL and PostgreSQL databases.
- Conducted testing and debugging to ensure application performance and reliability.
- Participated in **code reviews and contributed to improving code quality** and best practices.
- Technologies/Tools used: **Python, Django, JavaScript, Jinja, HTML, CSS, MySQL, Git & GitHub**,

Education

Sambalpur University Institute of Information Technology (SUIT)

Jun 2018 – Aug 2021

Masters of Computer Application (MCA), Computer Science

Sambalpur, Odisha

Sambalpur University

Jun 2015 – May 2018

Bachelor of Science

Sambalpur, Odisha

Personal Projects/Awards & Achievements

Asset Management System

Oct 2022 - Aug 2023

- Worked on Python-based asset management system for a VFX studio. The system will help **manage assets such as models, textures, animations, and project files**, ensuring they are easily accessible and organized
- Implemented and improved APIs for the AMS, enhancing data integration and communication between software tools, **resulting in a 30% increase** in data transfer efficiency.
- Utilized: - **Python, Linux, PyQt, Bash, GIT & GitHub, RST, JIRA, Confluence.**

File Storage System

Nov 2021 - May 2022

- Developed and implemented a secure web application for storing text and binary files using cutting-edge technologies, including facial recognition and encryption algorithms.
- Employed **encryption algorithms** to safeguard sensitive user data, ensuring compliance with data protection regulations.
- Utilized: - Python, Django, HTML, SQLite, Jinja, OpenCV and Bootstrap

E-Commerce Platform

Mar 2021 - Aug 2021

- Developed a full-stack e-commerce platform using Django for the back end and React for the front end.
- Implemented features such as user authentication, product management, and a shopping cart.
- Used MySQL for **database management and deployed the application** using Docker and managed it on AWS.
