- **Tools:** Visual Studio Code, GitHub,SubLime , Jenkins .
- **Web Server :,**GoDaddy .

INTERNSHIP

- Internship on **Mernstack**
Teceads solution, Duration – 90days .

CURRENT WORK EXPERIENCE

- **Working as a Software Developer in IntelCrop Solutions Pvt. Ltd.**
Duration - Jun 2021 to November 2021 .
- **Working as a Software Engineer in Iserveu Technology Pvt . Ltd**
Duration - Feb 2022 to Till Date .

PROJECT EXPERIENCE

- **Project 1:**
Project Detail: House Rent Project
Client – BigilHouse
Responsibility: -

I designed this web application name “Bigil House”. This is a Rented House website.

I designed the frontend using HTML, CSS and JavaScript. At the backend used PHP and MySQL.

Here the customer can find house as per their requirement house. At the client-side client can view all the details of the customer. If house is available conformation mail send to the customer. If client wants to add some extra information. He can add in the Admi panel but it visible in the frontend.

Register and book for design their company website. At the back-end client can view customer details. If not satisfied with their customer detail information and amount paid for the website can delete customer all information . And send email to the customer we can't built your website .

Technology Used: -PHP, Visual Studio Code, MySQL .

Hosting Server: - GoDaddy .

- **Project 2:**

Project Detail: Creative Line

Client – Intelcorp Solutions Private Limited

Responsibility: -

I designed the frontend using HTML, CSS and JavaScript. At the backend used PHP and MySQL. Here the customer can find service as per their requirement service like search for job, many advance computer courses , they can easily register their name And the client-side client can view all the details of the customer. If service is available confirmation mail send to the customer mail id .

Technology Used: -PHP, Visual Studio Code, MySQL .

Hosting Server: - GoDaddy .

REACT JS / NODE JS PROJECTS

- **Project 3:**

Project Detail: Common Onboarding

Client – iserveu Technology Pvt.Ltd

Description: I designed the API, database & backend.

Responsibility: -

Onboarding users dynamically .

In This project we are basically work on the database and backend. In this API the user will be onboard to Iserveu. **On onboarding process one JAVA API will be used in our end to onboard the user in transactional DB.** Then process will be success. After that design the Database as per company need using PostgreSQL and Firebase Then create API as per the database.

Role Played: -Node Js Developer

Technology Used: -PostgreSQL, Visual Studio Code, Node JS.

DataBase: - PostgreSQL, Firebase

Testing API: - POSTMAN.

Hosting Server: -AWS.

- **Project 4:**

Project Detail: Contest Registration Website & App Development.

Client – TrendsRajarajakumari

Description: I designed the frontend, database & backend.

Responsibility: -

Trends Rajarajakumari is contest registration website.

This is a small project where customers of Reliance Trends can register their name for Selfiecontest. After that client can view there all customer detail with there video and image. We design the front end in React JS and backend Node Js. Database MySQL Workbench. Then createAPI as per the database. Admin panel UI the complete the admin panel fetching API call.

Role Played: - Full Stack Developer.

Technology Used: - React JS, **MUI**, Visual Studio Code,**Node JS**.

DataBase: - MySQL

Testing API: - POSTMAN.

Hosting Server: - GCP

JOB RESPONSIBILITIES

- Designing front end website architecture using React.
- Designing Web UI as per Client Design.
- Ensuring responsiveness of applications.
- Coding of business logic modules using Node JS.
- Creating Databases functionality as per client requirements.
- Designing Development APIs as per Database and client requirements.
- Meeting both technical and clients need.
- Collaborate with colleagues to resolve technical issues.
