UI Developer

rajureddy99453@gmail.com

Professional Summary:

- Overall **1.5 years** of experience in web technologies with depth knowledge of **HTML5, CSS3, Sass, Bootstrap, JavaScript, React js, Redux, Redux-thunk, Material UI, Typescript, next js, graphql, redux-toolkit, jest with rtl.** technologies covering all phases of project development including business requirements analysis and implementation.
- 1.5 years of experience working with **React JS** applications with **Redux** state management.
- Experienced in designing and developing interactive Web Application using **HTML5, CSS3, Bootstrap, JavaScript, and React JS, Redux.**
- Experience in working with CSS pre-processor: **SASS.**
- strong experience in integrating with REST API services using fetch, XMLHttpRequest and axios library.
- Have worked on JavaScript middleware technology like redux.
- Having good hands-on experience in **ES6** features.
- Translate design and wireframe into high quality code.
- Experience in developing responsive web Application.
- Good analytical skill about PLUG INS.
- Passion for code standards, optimized and progressive enhancement.
- Good Knowledge on JSON.
- Experience with version controlling (GIT) for source code version management.
- Experience in integration of user-facing elements developed by front-end developers with server-side logic, writing reusable, testable, and efficient code and design and implementation of low-latency, high-availability, and performance applications with the help of NPM.
- Experience in working with IDE's (Visual Studio Code)
- Familiarity with Restful APIs.
- Knowledge of modern authorization mechanisms, such as JSON Web Token (JWT)
- Excellent communication, presentation and written skills.
- Developing and implementing highly responsive user interface components using React concepts.

Professional Experience:

- Worked as a Software Engineer at **HCL(Payroll:Value Cyber Tech Private Limited)** , Bangalore from 2022 August to Present.

Scholastic Profile:

- 2018-2022:B.TECH FROM JNTUA.

Technical Expertise:

Web Technologies:	HTML5, CSS3,Sass,Bootstrap,JavaScript,React js, Redux, Redux-thunk, Material UI, Typescript,next js,graphql,redux-toolkit,jest with rtl
Tools Known:	visual studio code.
Mobile Frameworks	Bootstrap with Mobile First approach

Experience Summary:**Project:**

Project:	ETSY
Client	ETSY
Environment:	HTML5, CSS3,Sass,Bootstrap,JavaScript,React js, Redux, Redux-thunk, Material UI, Typescript,next js,graphql,redux-toolkit,jest with rtl
Role:	UI Developer

Brief description of the project:

Etsy is an e-commerce website that focuses on selling handmade, vintage, and unique items. It provides a platform for independent sellers to showcase and sell their crafts, artwork, jewelry, clothing, home decor, and other creative products. Users can browse through a wide variety of listings and make purchases directly from individual sellers.

Etsy aims to support small businesses and artisans by offering them a marketplace to reach a global audience. The website encourages sellers to create their own online shops within the platform, where they can showcase their products, set prices, and interact with customers. Buyers have the option to search for specific items or explore curated collections across different categories.

Responsibilities:

- Designing and developing the responsive react components.
- Taking the ownership of both enhancement and maintenance.

Involve in sprint planning and grooming stories.

Code review and code optimization.

Deployment and production support.

Write unit tests using Jest and React Testing Library to verify the functionality of React components.

Ensure comprehensive test coverage for components, including edge cases and user interactions.
