PROJECT EXPERIENCE

❖ Project Name : CRM

Project Description

This project is based on how the organization managed customer interactions, optimizing communication, and enhancing overall relationship management. Designed and implemented the user interface with Angular, creating and responsive dashboard for managing customer profiles, interactions, and sales data.

Responsibilities:

- This is a continuously ongoing project where I use to manage the development through Scrum methodology.
- Receives change request inputs from end users and clients to create sprint.
- Collaborate with cross-functional teams to design, develop, and deploy responsive web applications, ensuring optimal user experiences across various devices.

❖ Project Name : Exam Portal

Project Description

Developed a comprehensive Exam Portal using a stack of technologies including Python (Django), Angular, Laravel, and MySQL. The portal aimed to streamline the examination process and enhance user experience for both administrators and students

Responsibilities:

- Designed and developed the backend using Python and Django, ensuring smooth data handling and validation.
- Created a dynamic frontend with Angular to provide a responsive user interface for exam scheduling, taking, and result viewing
- Integrated Laravel for real-time notifications and communication features, enhancing user engagement during the examination process.
- Utilized MySQL to design and manage the database, optimizing query performance for efficient data retrieval and storage.

❖ Project Name : Outlook Integration

Project Description

Developed an innovative Outlook Integration technology stack that includes Angular, Laravel, and MySQL. The application facilitated seamless communication between Microsoft Outlook and our internal platform, streamlining information exchange, and enhancing user productivity. It enabled users to create, cancel, and reschedule meetings directly from our website, also storing the complete meeting history.

Responsibilities:

- Designed and implemented the frontend with Angular, enabling users to synchronize emails, tasks, and appointments seamlessly.
- Developed backend APIs using Laravel to manage data transmission, synchronization logic, and authentication between the two systems.
- Designed and maintained the MySQL database to efficiently store and retrieve integrated data, ensuring data consistency and performance.
- Collaborated with the UI team to ensure a user-friendly interface and a smooth integration experience.
- Implemented error handling mechanisms to provide real-time feedback and diagnose integration issues.

❖ Project Name: Seat Booking on HRMS

Project Description

Implemented cutting-edge technology stack incorporating Angular for the front-end, Laravel for the back-end, and MySQL for data management. This application revolutionizes the way office seats are reserved and managed within our Human Resource Management System (HRMS). The user-friendly interface allows employees to effortlessly browse, select, and book seats, promoting efficient workspace utilization.

ACHIVEMENTS AND TRAINING

- Received best performer of the year award for the year of 2022.
- Certified Python developer professional from Seven Mentor, Pune.
- Have successfully completed certification courses on Python & Django full stack web from Developer boot camp and Python Programming master class through Udemy.

FUNCTIONAL ABILITIES

- Hard working and firm believer of positive attitude.
- Resource Planning & allocation.
- Clients Relationship Building.
