WORK EXPERIENCE:

Project Name: Winter Dashboard

Environment: Python, Django, HTML5, CSS, MySQL, Windows, Rest API.

Period: Nov 2022 – Till Date

Role: Software Developer

Description: The Winter Dashboard is a web-based application that can provide all the information related to all food items ordered by the customer in that restaurant. It is a dynamic system designed to display a restaurant's total orders and revenue for a given day. A crucial feature of this application is the Menu Builder, allowing for the creation of food categories, with users having the capability to add food items to these categories. Additionally, the application includes a comprehensive list of food items and functionalities for managing both order lists and customer dashboards. The customer dashboard provides insights into recent orders for individual customer, with convenient payment option available through razor pay.

Project Name: AD Hoc Shopping

Environment: Python, Django, HTML5, CSS, MySQL, Windows, Rest API.

Tools: PyCharm
