EXPERIENCE

GIANTMIND SOLUTIONS | PYTHON DEVELOPER

Chennai,IN | Nov 2024 – Till Date

- **Technologies Used: Python/Python Libraries**
- Working as a Python Developer at GiantMinds Solutions for Turing.
- Training an AI model to provide optimal solutions for Python-related problems.
- Ensuring that users receive accurate and efficient answers to their Python queries.

PACKT PUBLISHING | JUNIOR FULL-STACK DEVELOPER

Mumbai, IN | Sept 2022 – July 2024

- **Technologies Used: Python/Django, PHP/Laravel, HTML/CSS, Javascript, Vue.js, React, PostgreSQL.**
- **Project Contributions:**
 - Packt+ Subscription Portal:*
 - Created new CMS driven information pages and added features to enhance the authors' page within the Packt+ portal, focusing on improving the user experience.
 - Collaborated with senior team members to design and implement a new product (books and tutorials) category page. This involved a full-stack approach:
 - *Backend* : API development and data integration using Django and Laravel.
 - *Frontend* : Leveraging Vuejs and Reactjs to create dynamic interfaces that enhance user engagement and experience.
 - Datapro and Secpro Portals:*
 - Built and contributed to Datapro and Secpro, sub-portals of the Packt+ subscription, using Django for backend services and Vuejs for the frontend, particularly using Vuex for state management.
 - Backend services includes tracking system for recently watched tutorials and books, along with a recommendation engine that suggests products based on user activity. Advanced search and filtering options allow users to locate relevant content, while a quiz module assesses user comprehension with tailored questions and provides feedback to reinforce learning.
 - Developed highly reusable UI components in Vuejs that serve as modular building blocks across both Datapro and Secpro portals, streamlining development efforts and ensuring a consistent user experience. These components were designed with flexibility in mind, allowing them to be easily integrated into various features of each portal
 - Managed complex state across multiple components, optimizing API interactions and improving performance.
 - **Key Roles and Responsibilities:**
 - Worked on frontend design and logic for various pages and features, ensuring responsive and visually appealing interfaces.
 - Developed and maintained backend APIs in both Django and Laravel, ensuring secure and efficient data flow between the server and client-side applications.
 - Actively contributed to PR reviews and collaborated within a large Agile team, focusing on code quality,

performance improvements, and adapting to evolving project requirements.

STEG TECHNOLOGIES | FULL-STACK DEVELOPER

Mohali, Punjab, IN | Feb 2022 – AUG 2022

- **Technologies Used:** HTML/CSS, Node.js, Backbone.js and Kibo Commerce.
- **Project Contributions:**
 - Worked on Order Management and Billing section of an eCommerce site the company has taken for development.
 - In the Order Management section, implemented features that streamlined the order processing workflow, including order tracking, status updates, and fulfillment integrations, ensuring a smooth and efficient user experience.
 - Integrated the Kibo Commerce payment Gateway within the app, enabling secure and efficient payment processing and bill management.

OUR DESIGNZ PVT LTD | JUNIOR WEB DEVELOPER

Mohali, Punjab, IN | Feb 2020 – Jan 2022

- **Technologies Used:** Python/Django, PHP/Laravel, HTML/CSS, Javascript, React, MySQL.
- **Project Contributions:**
 - Portfolio Pages for the Clients:*
 - Created static and CMS driven portfolio web pages as per client requirements.
 - Developed these web pages using Django, React and Basic Frontend tools.
 - Intercom Chat Chrome extension:*
 - Developed an chat based chrome extension used to connect and communicate instantly with others on the same webpage. Messages are updated in real time, uninterrupted conversations.
 - Implemented features for real time communication, user authentication, and message notification using PHP/Laravel.
 - Developed the frontend part of this extension using Basic frontend tools like HTML, CSS, JS and Bootstrap.
- **Key Roles and Responsibilities:**
 - Worked primarily on server-side development using Python/Django, and MySQL, developing companies and client portfolios, chrome extensions, as per client requirements.
 - Designed user-friendly web pages using basic front-end technologies and front-end frameworks like React.

PROJECTS / OPEN-SOURCE

SHOPPINGX | LINK

Python, Django, HTML, JavaScript, CSS

- The app includes secure user authentication with social media login options, wishlist functionality, and a responsive design optimized for all devices..
- It offers an advanced product catalog with detailed views, including search and filter options for type, brand, price, ratings, and more, along with a shopping cart for managing purchases.
- It provides order tracking, history, status updates, and push notifications for order updates and promotions.

SPORTSAPP | LINK

Python, Django, Vue, Vite, TypeScript, SCSS, Docker

- SportsApp is a web application for managing sports-related data that includes functionalities for managing matches, teams, player details, and areas.
- Used Vue and TypeScript to provide a user-friendly interface for viewing, adding, editing, and deleting sports-related data.
- Used Django to manage data storage, business logic, and API endpoints for handling sports data and CRUD operations.
- Used Django REST Framework (DRF) for building a RESTful API to handle frontend requests.
- Used docker to run and deploy the application.

IMAGE VIEWER APP | [Link](#) Python, Django, React, TypeScript, Vite, AWS S3, PostgreSQL, ChatGPT

- An application that allows users to securely upload and manage images. The app features user authentication, integration with Amazon S3 for image storage, and an AI feature that can analyze images using ChatGPT.
- Used Django to develop the API to handle core functions like user authentication, image uploads, database interactions, and integrates with Amazon S3 for storing images.
- Used React to create a simple user interface for user authentication, uploading and displaying images with description.
- Integrated with the ChatGPT API to analyze images and generate AI descriptions.

CERTIFICATIONS

- AWS Certified Cloud Practitioner - **AWS**

HONORS & AWARDS

- Received the Packt+ Best IT Demo Presenter Of The Year Award 2023
