SUMMARY

My career vision is to utilize my proficiency software development and create machine learning models using generative AI, and also in a search of join a company that can help me in strengthening my knowledge and realizing my potential. I aim to collaborate with a dynamic team in company to solve complex problems, refine my technical skills. Eager to embark on a rewarding career journey and leverage my enthusiasm for technology to drive innovation and success within the organization.

WORK EXPERIENCE

Research Assistant

IIT Kharagpur, West Bengal (Apr 2024 – present)

Project Title: Climate Research and Geophysical Modeling to Assess the Ancient River.

- Conducted comprehensive climate data collection and analysis using advanced statistical software (e.g., Machine Learning, Python).
- Assisted in the design and execution of experiments to study the impact of climate change on various ecosystems.
- Collected field data, including temperature, precipitation, soil samples, and biodiversity metrics from diverse locations.
- Utilized remote sensing and GIS technologies to analyze spatial and temporal patterns in climate data.
- Maintained and calibrated climate monitoring equipment to ensure accurate data collection.

Python Full Stack Developer Trainee Palle Technologies, Bangalore, Karnataka Sep 2023 - Mar 2024

- Assisted in the development of new features for the company's web applications using python.
- Collaborated with the design team to implement user-friendly interfaces, enhancing user exp

SKILLS

Languages: Python, MySQL, HTML5, CSS3, JAVA SCRIPT

Web Framework: Django

ML Frameworks : matplotlib, pandas, numpy, cartopy, metpy, earthpy

LLM Models: GPT-4, GPT-3.5, GEMINI PRO, Bard, Llama2

Deep Learning Framework: Langchain, Hugging Face

IDEs used : Windows 11, ubuntu

Big Data Tool : Splunk

Cloud : Azure AZ-900

EDUCATION

- Institute of Technical Education and Research - Bhubaneswar, Odisha
Master in Computer Application 2021 – 2023 with aggregate of 9 cgpa
- Utkal University – Bhubaneswar, Odisha
Bachelor in Science (Physics Hons.) 2018 – 2021 with aggregate of 8.50 cgpa

HANDS ON PROJECTS HANDLED

Title: Diabetes Prediction (Health Care Domain)

- Description: Getting data from the client and analyzing the data by using some key factors, feeding the data and predicting whether a person having diabetes or not.
- Algorithms Used: Logistic Regression, Random Forest, Naive Bayes, Logarithmic Regression, SVM, Linear Regression

Title: Brain Tumor Identification (Health Care Domain)

- Description: Getting data from the client and analyzing the data by using some key factors, feeding the data and predicting whether a person having brain tumor or not.
- Algorithms Used: Logistic Regression, Random Forest, Naive Bayes, VIT, Gans

ACADEMIC PROJECTS

Smart Examination System

Smart Blind Stick Detector

Rainfall Prediction

WORKSHOP

Weather App(s'o'a Fablab)

Autonomous Vehicle Bootcamp(Skill Lync)

Declaration

I hereby declare that the information furnished above is true to best of my knowledge.

Place :Bhubaneswar
