Summary

To secure employment with an innovative company, leveraging my expertise in full-stack proficiency to make a significant contribution to the organization's success.

Projects

- **Travel and tourism application (Joyland):** Designed and developed a Travel & Tourism web application named Joyland with admin dashboard using J2EE. The front-end has been developed using HTML and CSS whereas MySQL has been used for the back end. The business logic has been developed using JSP and Servlets.

Project link: <https://github.com/Debasis23/travel-and-tourism.git>

- **Weather application (SkyCast):** Developed SkyCast, a weather application, using Spring Boot for the backend and HTML, CSS and JavaScript for the frontend. Integrated Open Weather API to fetch real-time weather data and implemented business logic following REST architecture. Successfully delivered a fully functional application, showcasing proficiency in full-stack development and API integration.
