Utkal University
- **GYAN BHARTI INSTITUTION OF SCIENCE AND TECHNOLOGY** 2016-2018
12th (SCIENCE)
CHSE Board
- **Govt.High School V.S.S.NAGAR** 2016
10th
BSE Board

Skills

- TECHNICAL SKILL : HTML, CSS, Wordpress, UI/UX, Graphics Design
- SKILL : Communication skills, Team Management, Time Management, Adaptive, Capable

Projects

- **City Tour and Travels (website)**
I worked on a project to develop a City Tour and Travels website using WordPress, a popular content management system (CMS). The goal of the project was to create an engaging and user-friendly website that provides information about various city tours and travel services offered by the company.

Key Responsibilities:

Requirement Analysis: I collaborated with the project team and stakeholders to gather requirements and understand the vision and objectives of the website.

Design and Theme Customization: I selected an appropriate WordPress theme and customized it to align with the branding and aesthetics of the City Tour and Travels company. This involved modifying the layout, colors, fonts, and overall design elements.

Content Management: I created and managed website content, including tour descriptions, travel itineraries, destination information, and pricing details. I ensured that the content was informative, accurate, and optimized for search engines.

Integration of Booking System: I integrated a booking system plugin into the website, allowing visitors to book tours and travel services directly through the website. This involved configuring the plugin settings, setting up payment gateways, and ensuring a smooth booking process.

Responsive Design: I ensured that the website was responsive and optimized for different devices, including desktops,

tablets, and mobile phones. This involved testing the website on various devices and making necessary adjustments to ensure a consistent and user-friendly experience.

Search Engine Optimization (SEO): I implemented basic SEO techniques, such as optimizing meta tags, using relevant keywords, and creating a sitemap, to improve the website's visibility in search engine results.

Performance Optimization: I optimized the website's performance by implementing caching mechanisms, compressing images, and minimizing code and file sizes. This helped to improve page load times and overall user experience.

Testing and Bug Fixing: I conducted thorough testing of the website to identify and fix any bugs, errors, or inconsistencies. This included testing different functionalities, forms, and user interactions to ensure a seamless browsing experience.

Training and Documentation: I provided training and documentation to the City Tour and Travels team, enabling them to manage and update the website content independently.

The City Tour and Travels website successfully showcased the company's services, attracted potential customers, and facilitated online bookings. It provided a visually appealing and intuitive platform for users to explore various city tours and travel options.

- **Mo Chai Bar(Website)**

I undertook a comprehensive project to develop the website for Mo Chai Bar, a unique chai experience destination. The objective was to craft an immersive online platform that captures the essence of our chai offerings and engages visitors seamlessly.

Key Responsibilities:

Requirement Analysis: Collaborated with the project team and stakeholders to discern website requirements, aligning with Mo Chai Bar's vision and objectives.

Design and Theme Customization: Carefully selected a WordPress theme, customizing it to reflect Mo Chai Bar's branding, ensuring an aesthetically pleasing and cohesive design.

Content Management: Created and curated compelling content, including chai descriptions, menu details, and pricing, optimizing it for both information and search engine visibility.

Integration of Ordering System: Integrated an efficient ordering system, allowing patrons to place orders directly through the website, involving configuration, payment gateway setup, and streamlining the ordering process.

Responsive Design: Ensured the website's responsiveness across various devices, conducting rigorous testing and adjustments for a consistent and user-friendly experience.

Search Engine Optimization (SEO): Implemented fundamental SEO techniques to enhance the website's visibility in search engine results, optimizing meta tags, keywords, and creating a sitemap.

Performance Optimization: Optimized the website's performance by implementing caching, image compression, and minimizing code and file sizes, resulting in improved page load times.

Testing and Bug Fixing: Conducted thorough testing to identify and rectify any bugs or inconsistencies, ensuring a seamless and error-free browsing experience.

Training and Documentation: Provided comprehensive training and documentation to the Mo Chai Bar team, empowering them to manage and update website content independently.

The Mo Chai Bar website successfully showcases our unique chai offerings, attracting visitors, and facilitating an intuitive exploration of our diverse chai experiences. It serves as an inviting and visually appealing platform, embodying the essence of Mo Chai Bar.

Achievements & Awards

- I had participated in Utkal Sammilani quiz competition and got 1st award.
- Excellence in leadership Scout and Guide awards (08/2014).

Interests

- Coding and Web designing
- Painting and designing
- Listening music

Languages

- English
- Hindi
- Odia
