Summary

Software Engineer skilled in **React.js front-end development**, with expertise in **JavaScript, HTML5, CSS, Java, and SQL**, focused on building responsive, high-quality web applications.

Skills

Languages: Java, JavaScript (ES6+), HTML5, CSS3, SQL, PHP

Frameworks & Libraries: React.js, Bootstrap, Tailwind CSS, MUI (Material UI)

Web Technologies: Responsive Design

Tools: Git, GitHub, VS Code, Netlify, Canva

Soft Skills: Problem-solving, Communication, Team Collaboration, Time Management

Experience

Front-End Developer

Aug 2024 – Sept 2025

ICS (Indbharat Consultancy Services)

- Developed and maintained **5+ responsive web pages** using React.js, HTML5, CSS3, and JavaScript, improving overall **page performance and usability by 25%**.
- Converted **UI designs** into **responsive, pixel-perfect React components** in collaboration with UI/UX designers and stakeholders.
- Integrated **REST APIs** to fetch and display real-time data, reducing **manual updates by 40%** and improving data accuracy across client applications.
- Optimized React components and CSS for **performance optimization** and improved usability across multiple browsers.

Projects

Indbharat Global Foundation | NGO Website

March 2025 – July 2025

- Developed a professional NGO website with **15+ content sections** to showcase the foundation's mission, social initiatives, and community impact, increasing **online visibility and engagement by 40%**.
- Designed a **fully responsive UI** optimized for **mobile, tablet, and desktop devices**, improving **user retention by 35%**.
- Structured and managed **10+ dynamic content sections** for programs, campaigns, donations, and volunteer engagement, improving **navigation efficiency by 30%**.
- Enhanced user experience by implementing **clear navigation, optimized layouts, and accessibility best practices**, reducing **user drop-off rate by 20%**.

ChatGPT Application | React.js

October 2024 – February 2025

- Developed a **full-featured AI-based chat application** supporting **real-time conversations for 100+ test users**, delivering fast and interactive user experiences.
- Integrated **API-powered responses** to generate dynamic, context-aware answers, achieving **95% response accuracy** during testing.
- Designed a **modern, responsive UI** compatible with **multiple screen sizes**, improving **mobile usability score by 40%**.
- Optimized **state management and API calls**, reducing **response time by 35%** and significantly improving application performance.

Awards & Certifications

- Full Stack Development Certificate – JSpiders (2024):** Completed an intensive full stack program covering **Java, Advanced Java, HTML5, CSS3, JavaScript, React.js, SQL and Spring Boot**, along with real- world project experience.
- React.js Development Certificate – Udemy (2025):** Completed project-based training focused on React components, hooks, API integration, and responsive front-end development.

Education

Bachelor of Technology (B.Tech) – Computer Science & Engineering

Modern Engineering & Management Studies, Odisha

Graduated: 2024

CGPA: 8.30 / 10
