Company Name: The Technovet

Experience: 21st May 2022 – Till Date

KEY RESPONSIBILITIES

- Developing and maintaining websites & web based applications.
- Take care of frontend, backend & database work.

PROJECT DETAILS

ZipDJ Music Distribution Platform (Zipdj.Com)

Tech Stack Used: React, Laravel, MySQL

Project Description: I contributed to the development of the ZipDJ Music Distribution Platform, using React, Laravel, and MySQL. This online platform enables DJs, producers, and music professionals to discover, download, and share high-quality music tracks. I worked on front-end components using React, implemented robust back-end functionalities with Laravel, and optimized the database using MySQL. I actively participated in agile development methodologies, ensuring clean code and collaborating with the quality assurance team. My experience on the ZipDJ project honed my skills in React, Laravel, and MySQL, contributing to the creation of an exceptional music distribution platform.

Artisan Medical Solutions for Fertility Industry (Artisanfertility.Com)

Tech Stack Used: Ext JS, PHP, Oracle, MySQL

Project Description: As a member of the project team at Artisan, I contributed to the development of a web based software for various evolving needs of the fertility industry. Leveraging my skills in EST JS, PHP, Oracle, and MySQL, I played a key role in implementing various features and functionalities. I collaborated closely

with the team to ensure seamless integration of the technologies and delivered high-quality code. Through my efforts, I contributed to improving user experience and optimizing the website's performance. My involvement in this project showcases my proficiency in web development and highlights my ability to work effectively in a collaborative environment.

Gametes Witnessing System

Tech Stack Used: Filament, Laravel

Project Description: As a key contributor to the Gametes Witnessing System project, I utilized Filament, Laravel, and PostgreSQL technologies to develop an innovative solution. The Gametes Witnessing System aimed to enhance the efficiency and accuracy of witnessing gametes during assisted reproductive procedures. My role involved designing and implementing a robust system that facilitated the seamless tracking and documentation of gametes, ensuring their proper identification and management throughout the process. By leveraging my expertise in Filament, Laravel, and PostgreSQL, I successfully delivered a reliable and user-friendly system, significantly improving the overall workflow and quality control of gametes witnessing.

Nara Premium Hookah eCommerce Solution (Narahookah.Com)

Tech Stack Used: Laravel, MySQL

Project Description: I contributed to the Narahookah project, leveraging Laravel and MySQL. As part of the development team, I designed and maintained the backend infrastructure, implemented database schemas, and ensured platform performance and security. Collaborating with a talented team, we created a user-friendly eCommerce solution with features such as product catalog management, secure payment gateways, and an intuitive shopping cart system. Working on Narahookah.Com enhanced my technical skills and provided valuable experience in eCommerce development, delivering a seamless online platform for hookah enthusiasts.
