Hello, I'm Dibakar Mistry, Dedicated Fullstack Java Developer with 1 year of experience in J2EE technologies like Java, SpringBoot, Microservices, Hibernate with excellent problem solving skills. creating efficient and user-centric web applications. Proficient in both frontend and backend technologies, with a passion for problem-solving and collaboration.

Education

Gandhi Institute of Technology And Managemant, (GITAM) BBSR

Sep 2019 - July 2022

- Bachelor of Technology
8.37 CGPA

Nalanda Institute of Technolgy, (NIT) BBSR

Aug 2015 - Jun 2018

- Diploma
8.91 CGPA

Panchyat High School Adhikariguda, Umerkote

Aug 2013 - Jun 2015

- 10th (BSE)
76%

Experience

Silan Software Pvt. Ltd. Bhubaneswar, Odisha

Nov 2022 - Sept 2023

- Strong proficiency in java, including experience with java 8
- Experience with Spring Framework, including SpringBoot, Spring MVC.
- Hands on Experience in application development using Spring Boot with Micro Services.
- Developed and maintained backend systems and APIs using Java, ensuring high performance, scalability, and security for critical applications.
- Designed and implemented database schemas, optimized queries, and managed data using SQL databases like MySQL.
- Designed and implemented RESTful APIs with Spring Boot, enabling efficient data exchange between the front end and back end.
- Implemented Spring Security to enhance application security, including user authentication and authorization.
- Hands on experience in application development using Restful web services.

Technical Skills

Technologies	: Core Java(J2SE), AdvJava(J2EE), Spring, SpringMVC SpringBoot with MicroServices
Operating System	: Windows 10 / 11
RDBMS	: MySQL
Application Server	: Tomcat 8.0

Employee Management System :-

Role	: Developer	Environment	: Windows 11
Team Size	: 3	Database	: MySQL
Technologies	: Spring Boot with MicroServices	IDE	: STS

Involve in developement of various enhancements. involve in coding and manual testing and also involved in business understanding. involve in code review (self review and peer review) written java source codes as per the requierments of application.

Description :-

- The Employee Management System major project is an application which is based on managing the employee details.
- The main purpose for developing this Employee Management System Project in Java Spring Boot is to manage all the details about employee, leave, salary, etc.
- There are two type of users available in the project, first on is Admin and second one is Employee. Admin can add new employee, leave, salary also managed the employee timesheet details.
- The system will have multiple features that enable organization to manage their employee effectively. The System will include an employee database that contain relevant employee information

Grievance Management System :-

Role	: Developer	Environment	: Windows 11
Team Size	: 3	Database	: MySQL
Technologies	: Spring Boot with MicroServices	IDE	: STS

Description :-

- Grievance Management System is implemented in java platform. The main objective of this project is to develop an application where a student / parent can lodge his / her grievance and can view their status, how they are getting solution over grievance in detail.
- Hence this project offers an effective solution where students or parents can lodge a complain and a committe formed by the Management will resolve the issue and post the solution.
- The admin can view the detail of no. of grievances. It overcomes the issue of managing manual works.
- It offers an effective solution where students can check status view their grievance details.
