Career objective

To contribute effectively as part of a team in a challenging and competitive environment, demonstrating unwavering dedication and commitment. I aim to achieve results within specified timeframes, supporting the organization in reaching its goals.

Technical Profile

- **Programming Languages:** JavaScript
- **Libraries:** React.js, Redux, React Router
- **Frameworks:** Bootstrap, Material-UI, Next.js
- **State Management:** Redux, Context API
- **Testing:** Jest, React Testing Library
- **Environment:** Node.js, npm, Webpack, Babel
- **Database:** MySQL
- **Operating Systems:** Windows
- **Software/IDE:** Visual Studio Code
- **API Development/Testing:** Postman, REST APIs
- **Version Control/DevOps Tools:** Git, GitHub, GitLab
- **Other:** HTML5, CSS3, SASS, Responsive Design

Professional Summary

- Over 2+ years of experience in React.js, developing web-based and enterprise applications.
- Proficient in building Business Applications, Web Components, and Enterprise Applications using React.js.
- Strong implementation knowledge of UI frameworks, including Bootstrap, React Bootstrap, and Material-UI.
- Experienced in utilizing React Router for efficient navigation and routing within applications.
- Skilled in handling API integrations, including RESTful services, with robust error handling.
- Proficient in state management using React Redux and Context API.
- Experienced in implementing React Hooks for managing component states and side effects.
- Knowledgeable in version control tools, with hands-on experience in user authentication and session management in React applications.
- Adept at working with CORS configurations and debugging to ensure smooth cross-origin resource sharing and application performance.

Career Path

- Working as a Developer in **Nivtech Solutions Pvt. Ltd.**, Bhubaneswar from Dec 2022 to till date.

Job Profile

- **Total Experience:** 2+ years of hands-on experience in React.js technologies.
- **Project Experience:** Extensive experience working on both web-based and enterprise-level projects.

Educational qualifications

- **B.Tech. + M.Tech. in Electrical Engineering (Dual Degree)**

Completed in 2018

- **Higher Secondary Education**

Council of Higher Secondary Education, Completed in 2013

- **10th Grade**

Board of Secondary Education, Completed in 2011

Project Details

#1. Organization: Nivtech Solutions Pvt. Ltd.

- **Client:** Internal
- **Project Title/Name:** Satsanga Project
- **Project Location:** Bhubaneswar
- **Team Size:** 5
- **Role:** Design and Functional Development
- **Technologies Used:** Windows XP, JavaScript, React.js, Python, Django, React Bootstrap, Material-UI, CSS, React Router, Redux, MySQL, JWT, Selenium, Git, GitHub, AWS

Description: The Satsanga Project is a web-based platform designed to bring together individuals interested in spiritual growth and philosophical discussions. It facilitates the creation, joining, and management of Satsang sessions, allowing users to engage in meaningful conversations and explore various spiritual practices. The application emphasizes user experience by offering a responsive and intuitive interface, built using modern technologies such as React.js, Material-UI, and React Bootstrap. The backend is powered by Python and Django, with robust data management provided by MySQL. This project aims to foster a community of like-minded individuals seeking deeper understanding and shared experiences in a digital space.

Roles and responsibilities:

- Designed and implemented responsive user interfaces using React.js, Material UI, and React Bootstrap.
 - Developed key features, including filtering by term year and date ranges, and managing disciple data.
 - Integrated front-end components with backend APIs for real-time data fetching and updating.
 - Managed data presentation in a tabular format with sorting, filtering, and search functionalities.
 - Implemented file upload and download features, including Excel file handling.
 - Developed functionalities for adding and editing Oblates, ensuring seamless data management.
 - Conducted extensive testing and debugging to ensure cross-browser compatibility and fix issues.
 - Produced clean, well-documented, and maintainable code.
 - Optimized the application for performance improvements.
 - Collaborated with team members for seamless integration and adherence to project timelines.
-
- Participated in code reviews and provided feedback.

#2. Organization: Nivtech Solutions Pvt. Ltd.

- **Client:** In-House Product
- **Project Title/Name:** School Management System
- **Project Location:** Bhubaneswar
- **Team Size:** 15
- **Role:** Design and Functional Development
- **Technologies Used:** Windows XP, JavaScript, React.js, .NET, React Bootstrap, Material-UI, CSS, React Router, Redux, MySQL, JWT, Selenium, Git, GitHub, AWS

Description: The School Management System is a robust web application developed to streamline administrative tasks and improve communication within educational institutions. This system offers a centralized platform to manage various school operations, including student records, course enrollments, attendance tracking, grade management, and communication between teachers, students, and parents. The application is built using modern web technologies such as JavaScript, React.js, Material-UI, and React Bootstrap, aiming to enhance operational efficiency and foster a collaborative learning environment. The system's admin panel provides comprehensive management capabilities, covering functionalities like registration, attendance, assignments, promotions, student classes, certificates, and fee management.

Roles and responsibilities:

- Designed and developed user interfaces for the admin panel using Material-UI and React Bootstrap, ensuring a responsive and consistent design.
- Implemented core functionalities within the admin panel, including registration, attendance entry and updates, assignment management, student promotions, class assignments, and more.
- Integrated APIs to connect the frontend with backend services, ensuring accurate data retrieval and manipulation, particularly within the admin panel.
- Conducted thorough testing across all application components, focusing on both unit testing and integration testing to ensure smooth functionality.
- Developed well-structured, maintainable code, following best practices in coding standards and documentation.
- Managed the admin panel's specific features, including student confirmation, certificate generation, messaging, club management, fee management (including ADHOC fees and fee ledger), and search functionalities.
- Collaborated with a cross-functional team to align project goals and deliverables, ensuring the project met both technical and business requirements.

Personal Attributes

- Team player with a positive attitude and a strong willingness to learn new technologies.
- Detail-oriented with comprehensive problem-solving abilities.
- Adaptable to changing environments, with a focus on continuous improvement.
