SUMMARY

Experienced Frontend Web & Mobile App Developer with 2 years of expertise. Proven track record in delivering responsive, visually engaging web experiences, optimizing performance, and collaborating effectively with cross-functional teams. Committed to continuous skill enhancement and staying current with industry trends to craft impactful digital solutions.

SKILLS

- React.js
- Javascript
- React Quill
- Angular
- CSS
- React Native
- Redux
- Tailwind
- Stencil.js
- Restful Api
- D3.js
- Git

FUNCTIONAL SKILLS

- Agile
- Jira

WORK EXPERIENCE

Greytip Software | Bangalore

SDE-1 (Frontend) • Feb-2022-Sep-2023

- Contributed to bug fixes and enhancements for the Mobile app, gaining practical mobile development experience.
- Played a key role in upgrading Angular from version 10 to 11.
- Gained proficiency in API integration, using services, and working with interfaces in Angular 11.
- Commenced learning Stencil JS. To work on chat-Bot project.
- Developed chat responses and a summary page for a chat bot project. Implemented attachment functionality, including a drag-and-drop component
- Designed an accordion feature for payment and deduction details.
- Created a graphical pie chart using the chart library of java script to illustrate payment breakdowns.
- Collaborated on API integration and Worked on navigation and learned pagination concepts.
- Successfully resolved approximately 150-200 bug tickets, contributing significantly to the company's product quality.

Newton School

Intern • July-2021 - Feb-2022

1. Technical Skills:
 - Proficient in HTML, CSS, JavaScript, React.js, and Java.
2. Project Highlights:
 - Developed a Myntra clone with a focus on Java Script.
 - Created an engaging Memory Game using HTML, CSS, and JavaScript.
 - Designed a sleek and responsive personal portfolio showcasing skills and projects.
 - Implemented a functional Tip Calculator application with JavaScript.
3. Collaborative Development:
 - Collaborated with cross-functional teams for project development and troubleshooting.
 - Participated in code reviews, contributing to best practices and code quality.
4. Continuous Learning:
 - Stayed updated on the latest front-end development trends.
 - Expanded skills in backend development using Java.
5. Problem-solving and Innovation:
 - Demonstrated effective problem-solving in a fast-paced environment.
 - Introduced innovative solutions to enhance project efficiency and user experiences.

PROJECTS

Netflix Clone

Diving into the world of streaming, I developed a Netflix clone that mirrors the functionality of the popular platform. Leveraging React for its dynamic interface and the TMDB API for real-time movie data, the project boasts features that elevate the user experience.

- **Dynamic Content Loading:**
 - Employing lazy loading techniques, the clone ensures swift loading times, providing users with a seamless browsing experience.
- **Genre and List Filters:**
 - Enhancing user navigation, I implemented genre filters and list filters based on the year of release, allowing users to tailor their content exploration.
- **Rating-based Filtering:**
 - Recognizing the importance of user preferences, the project incorporates a rating-based filter, ensuring personalized content recommendations.
- **Responsive Design:**
 - With a commitment to accessibility, the Netflix clone is designed to be responsive across various devices, facilitating an immersive experience on screens of all sizes.

This project not only reflects my technical prowess but also demonstrates my dedication to creating user-friendly interfaces that seamlessly integrate with real-world data.

Packers Movers App (Mobile App)

- **Mobile App Development Showcase**

In my journey as a freelance developer, I spearheaded a groundbreaking project, crafting a comprehensive Packers and Movers Mobile App. Tailored to meet the dynamic needs of the logistics industry, this app mirrors the efficiency of services akin to platforms like Porter.

Key Features:

- **User-Centric Authentication:**
 - Seamlessly integrating security and user experience, the app incorporates OTP verification alongside a robust login/logout system.
- **Location Precision with Google Maps:**
 - Leveraging the power of Google Maps, the app ensures precision in location services, complemented by custom markers for an intuitive user interface.
- **Real-Time Connectivity:**
 - Enabling real-time connectivity, the app facilitates users in locating nearby vehicles efficiently, streamlining the process of finding the perfect transport solution.
- **Secure and Seamless Payments:**
 - With a focus on user convenience, the app includes a secure payment gateway, ensuring seamless transactions for the Packers and Movers services.
- **User Wallet Integration:**
 - Elevating the user experience, the integration of a user wallet feature provides a centralized hub for managing financial transactions within the app.
- **Pushing the Boundaries with Notifications:**
 - To keep users informed and engaged, the app employs push notifications, delivering real-time updates and enhancing user engagement.
- This project not only showcases my technical expertise in mobile app development but also underscores my commitment to delivering solutions that seamlessly blend innovation, user experience, and industry-specific functionality.

Notes App

- **Technologies Used:**
 - Developed using React, Redux, Hooks, React Quill, and Tailwind CSS.
- **Key Features:**
 - Implemented a loading page for a seamless user experience.
 - Utilized React Router for efficient and responsive routing within the application.
 - Integrated global state management with Redux for streamlined data flow.
 - Enhanced user engagement by allowing the addition of images, audio, and video in notes.
 - Implemented an intuitive edit feature to modify existing notes.
 - Impeccable responsiveness across various devices, guaranteeing a seamless and engaging user interface.

Company Portfolio

- **Innovative UI Design:**
 - Developed a visually appealing user interface using advanced techniques such as Image Slider Flexbox, Grid, and strategic positioning to enhance user experience.
- **Responsive Design Mastery:**
 - Ensured seamless accessibility across all devices by implementing responsive design principles. Utilized Media Queries to create a dynamic and user-friendly interface adaptable to various screen sizes.
- **Figma Design Expertise:**
 - Translated concepts into reality by creating detailed Figma designs, providing a comprehensive visual blueprint for the development team.
- **Optimized User Experience:**
 - Enhanced overall user satisfaction by implementing intuitive UI designs, resulting in a [X]% increase in user engagement.
- **Cross-Platform Accessibility:**
 - Ensured a consistent and enjoyable user experience across diverse platforms.
- **Streamlined Collaboration:**
 - Facilitated effective collaboration between design and development teams by producing meticulous Figma designs, leading to improvement in project timelines.
- **Technical Skills**
 - UI/UX Design: Flexbox, Grid, Positioning, Swiper Library.
 - Responsive Design: Media Queries
 - Prototyping: Figma

Library System

- Engineered a feature-rich Library Management System with a modern, component-based architecture, ensuring scalability and seamless functionality..
- Implemented data synchronization with APIs using Axios, enhancing real-time data updates and optimizing user experience.
- Designed and integrated an intuitive search bar, enabling users to filter and access required information effortlessly.

Myntra Clone

- Developed a sophisticated Myntra clone with a robust HTML, CSS, and JavaScript foundation, ensuring a seamless and interactive user experience.
- Utilized CSS properties such as grid and flexbox, enhancing the site's user-friendliness and responsiveness

EDUCATION

Bachelor of Engineering.

Saraswati College Of Engineering • 2017–2021
