Professional Summary

Java backend developer with hands-on experience in Spring Boot, RESTful APIs, Spring Data JPA, and MySQL. Experienced in building CRUD-based applications and microservices using Spring Cloud components, with a strong focus on clean architecture, scalability, and backend development best practices.

Education

Siksha 'O' Anusandhan University (ITER)	Sept 2023 – June 2025
Master of Computer Applications (MCA)	Bhubaneswar, Odisha

Experience

Backend Developer Intern – Zidio Development (Remote)	June 2025 – Aug 2025
--	----------------------

- Contributed to backend development features using Java, Spring Boot, and RESTful services.
- Implemented full CRUD operations using Spring Data JPA with MySQL.
- Developed RESTful APIs with Spring Boot and implemented authentication using Spring Security.
- **Tech Stack:** Java, Spring Boot, Spring Data JPA, MySQL, Spring Security

Web Developer Intern – GAOtek Inc. (Remote)	Sept 2025 – Dec 2025
--	----------------------

- Developed responsive web pages and UI components for learning and utility websites.
- Optimized layouts, improved user experience, and ensured cross-device compatibility.
- Collaborated on frontend features using modern web standards and version control.
- **Tech Stack:** JavaScript, Bootstrap, GitHub

Projects

Student Management System <i>Java, Spring Boot, MySQL, Thymeleaf</i>	Github
---	--------

- Developed a student management web application using Spring Boot, Spring MVC, and Thymeleaf to efficiently manage student records through a clean and user-friendly interface.
- Implemented full CRUD operations using Spring Data JPA and MySQL, ensuring reliable data persistence.
- Designed the application with a controller–service–repository architecture to ensure maintainable backend processing and seamless UI-database communication.

Spring Cloud Microservices Demo Application <i>Java, Spring Boot, Spring Cloud (Eureka, Config Server, API Gateway, OpenFeign, Resilience4j, Zipkin), Maven</i>	Github
--	--------

- Designed and implemented a microservices-based application using Spring Boot and Spring Cloud, with multiple independent services registered in Eureka Service Registry for service discovery.
- Implemented centralized configuration using Spring Cloud Config Server and API Gateway routing, enabling inter-service communication via OpenFeign with client-side load balancing and Resilience4j circuit breakers.
- Integrated Zipkin for distributed tracing and Spring Boot Admin Server to monitor service health, application status, and request flow across microservices.

Technical Skills

Programming Languages: Java, JavaScript

Backend Technologies: Spring Boot, RESTful APIs, Spring Data JPA, Spring Security, Spring Cloud (Microservices)

Database: SQL, MySQL

Frontend Technologies: HTML, CSS, Bootstrap

Tools: Git, GitHub, Maven, Postman, Swagger, JUnit
