SKILLS				
• Languages & Databases: Python JAVA C++ Asterisk MySQL MongoDB Redis Graph DB neo4j • Tools & frameworks : Django Flask SpringBoot Jenkins Docker Postman Talend Visual Studio Code Eclipse PyCharm MATLAB Subversion (SVN) GIT • Others: Bash/shell scripting Jira API Development Micro Services Debugging Server Handling OOPs Unit Testing				
WORK EXPERIENCE				
VOXOMOS SYSTEMS PVT. LTD Backend Engineer, Noida July' 21 – Present				
PROJECTS	Survey Builder Platform	• Achieved a 90X reduction in development time by creating a DIY survey platform using Python and Django to automate ReactJS components and Asterisk files. • Designed an optimized user-friendly interface with ReactJS, enhancing accessibility and user experience. • Integrated Asterisk for voice processing and implemented MongoDB for scalable, reliable storage of survey responses.		
	WhatsApp Survey	• Led collaboration to develop WhatsApp Bot by using MySQL & Java to enhance vendor onboarding, achieving a remarkable 100% increase in information accuracy and streamlined data acquisition. • Automated WhatsApp reminders and voice calls to default users resulted in a significant decrease in incomplete forms. • Collected data & shared via API according to pre-defined criteria, resulting in a 4x reduction in customer outreach time		
	WhatsApp Marketing Platform	• Created a no-code platform for business-customer interactions via WhatsApp, SMS, and voice channels using Django and Python. • Developed features, including catalogues, broadcasting, bulk messaging, and custom notifications for conducting surveys. • Utilized Java to initiate campaigns and implemented MongoDB for efficient data management.		
	VoiceBot	• Design an inbound call system that enables users to obtain real-time product delivery status updates • Implemented Automatic generation of audio prompts based on the outputs of various APIs; Utilized Java to build the system • Leveraged Asterisk as the telephony platform and MySQL for efficient data storage and retrieval; ensuring accurate updates		
	ChatBot	• Collaborated with the team to design an efficient database schema, improving data organization and accessibility • Led the testing and quality assurance of the chatbot, ensuring standards of functionality and performance were met • Optimized user experience & enhanced data integrity through collaborative efforts in database design and quality assurance		
	Authentication Survey	• Developed registration and authentication module with email verification and password reset for multiple websites • Implemented customizable email templates for personalized communication, including welcome, recovery, and verification • Ensured secure and seamless user authentication by utilizing industry-standard protocols and encryption techniques		
ACADEMIC PROJECTS				
(M.Tech. Thesis)		<u>Rehabilitation of hand with the help of Cyber Glove</u> • Designed a virtual platform utilizing Cyber Glove to enhance the engagement and effectiveness of hand exercises • Focused on addressing the rehabilitation needs of post-stroke patients with upper limb impairments • Explored innovative approaches to enhance rehabilitation exercises for improved patient outcomes		
OTHER PROJECTS		<u>Forensic Detection of Median Filtering in the Digital Images</u> • Developed and implemented a blind forensic algorithm to detect instances of median filtering manipulation in images • Explored the application of median filtering as a technique to remove forensically significant fingerprints from digital images • Applied image analysis techniques and statistical methods to analyze the effects of median filtering on image forensics		
CERTIFICATIONS				
PLATFORM	COURSERA	• Studied Data Structures (Arrays, linked lists, Tree, Heap & Hash Map) offered by the University of California San Diego • Completed Algorithms on Graphs studied (BFS & DFS) offered by the University of California San Diego • Studied and grasped Algorithmic Toolbox (Greedy, Divide and conquer) by the University of California San Diego • Gained Understanding of Algorithms on Strings offered by the University of California San Diego		2023
EDUCATION				
Degree		Institute	Year	Result
M.Tech - Electrical		Indian Institute of Technology, Gandhinagar	2021	7.50 CGPA
B.Tech - Electrical		Rustamji Institute of Technology, Gwalior	2018	7.03 CGPA
