Programming Languages: Kotlin, C, Java, Python, C++

Web Technologies: HTML, CSS, JavaScript, React.js, TailwindCSS, Bootstrap, Node.js, Express.js, REST APIs

Database: MongoDB, MySQL

Other: Data Structures and Algorithms (DSA), Machine Learning

Certifications

- **Full stack web Development** – Apna College
- **App Development** – Udemy
- **Artificial Intelligence and Machine Learning** – CTTC, Bhubaneswar

Projects

Hospital Based Management System

- Designed a technological solution for OPD queuing, bed management, and hospital inventory monitoring.
- Proposed integration of NIC-developed modules into a centralized city-wide healthcare network.

E-Commerce WebSite (MERN Stack)

- Built product listing, search, cart, and checkout modules for a complete shopping experience.
- Developed an admin dashboard for product management, order tracking, and inventory updates.
- Integrated secure API routes, user authentication, and real-time cart updates on the frontend.

Face Detection and Recognition

- Developed a software to recognize human faces using various ML models for accurate detection and identification.

Sonar: Rock or Mine Prediction

- Built a classification model using Random Forest and SVM to differentiate sonar signals between rocks and mines.

Languages

Odia (Native), Hindi, English
