PROJECTS

Agile Retro Tool (02/2023 - 09/2023)

- Agile Retro Tool is an enterprise-online retrospective tool for remote teams. Our guided retrospective techniques ensure effective Scrum Retros are conducted. There are many other features that would help conduct effective health checks, polls and surveys on the fly.
- I was working in this Agile Retro tool on AWS platform with Spring Boot as Backend and Angular as a Frontend technology supporting MySQL as a Database.

Claims Management System (06/2022 - 07/2022)

- A HealthCare Management Organization wants to strengthen its Middleware by exposing the core logic related to Claims Management as Microservices.
- This middle ware Microservices will be hosted on Cloud so that all the up/downstream applications can get an access to this for performing business transactions. There will also be a Member Portal to be developed part of this scope that consumes these Microservices and responses back to members who are in need of Claim related information.

VOLUNTEERING EXPERIENCE

volunteer and participant of Street Social Service Event.
