

JAGAMOHAN PANDA

Full Stack Developer with a focus on GenAI

Phone: +91-7205816681 Email: pandajagamohan12@gmail.com [LinkedIn](#) [GitHub](#) [Portfolio](#)

Summary

Full Stack Developer with 2.5+ years of experience building scalable web apps using the MERN stack, TypeScript, and cloud-native tools. Skilled in OAuth, AI integrations, and full-cycle product delivery. Known for writing clean, maintainable code and collaborating across teams to deliver fast, user-friendly features.

Skills

- **Languages:** JavaScript (ES6+), TypeScript, Python
- **Frontend:** React.js, Next.js, Redux, Tailwind CSS, MUI, HTML5, CSS3, SCSS
- **Backend:** Node.js, Express.js, Django Rest Framework, GenAI, Postman, NPM
- **Databases:** PostgreSQL, MongoDB
- **DevOps & Tools:** Git, Docker, Jest, CI/CD (GitHub Actions, Vercel), AWS (EC2, S3, Lambda)
- **Others:** Data Structures & Algorithms, REST APIs, JWT, OAuth2.0
- **Strengths:** Problem-solving mindset, Fast learner, Strong communicator, Time management, Ownership-driven

Experience

Software Engineer (Contract), 1Touch Ventures, Boston USA

Jan 2025 – Present

- Developed a **CMS portal** for football scores, AI-generated articles, filtering, and search using **React, Node.js, and OpenAI**.
- Integrated **external APIs** to fetch, process, and store historical match data in **MongoDB** for real-time insights.
- Automated SEO using **dynamic metadata** and **Google Search Console**, leading to a 30% boost in organic traffic.
- Designed and implemented a **cron job** that updates **seven client websites** with football scores, stats, and AI content.

Software Development Engineer I, Dot Product Solutions LLP, Kerala

Nov 2023 – Dec 2024

- Boosted **social media engagement by 20%** using AI-powered content recommendations (**GenAI**).
- Developed a **Shopify promotion app** to automate discount campaigns, increasing efficiency and conversion rates by **15%**.
- Enhanced team productivity by implementing **Agile** practices, increasing throughput by **25 tickets per week**.

Associate Software Engineer, Indus Net Technologies Pvt. Ltd., Kolkata

Sep 2022 – Nov 2023

- Refactored **Node.js** and **React** components, reducing technical debt and improving performance.
- Achieved **96% milestone adherence** by managing **SDLC** processes effectively.

Projects

Alkem Marketplace [live](#)

- Engineered secure and scalable **role-based access control (RBAC)** with three distinct user roles (Admin, Distributor, Customer) using JWT and custom middleware in Node.js.
- Developed a dynamic product listing UI in **React.js** with real-time cart integration — visually indicating products already added to cart.
- Built a persistent shopping cart system with **Redux**, ensuring session-based and login-based state retention for seamless user experience.
- Designed and implemented robust **authentication and order tracking** flows with protected routes and clean UX.
- Improved engagement by **25%** through responsive layouts and personalized product catalog filtering..

Teckstack : *React.js, Redux, Node.js, Express.js, PostgreSQL*

Luke AI live

- Developed AI-powered hashtag generator using **GPT-4**, allowing users to generate context-aware, trending hashtags based on post captions.
- Implemented secure **OAuth 2.0 integration** with Meta, Twitter, and LinkedIn APIs to enable cross-platform post publishing directly from the dashboard.
- Collaborated with Meta's developer platform to configure app credentials, gather user tokens, and register API scopes for post access.
- Integrated a dynamic calendar view to manage **historical and upcoming scheduled posts**, enhancing content visibility and scheduling.
- Embedded **Palleon Editor** to design and edit post creatives/templates within the dashboard before publishing.
- Significantly reduced manual content creation and switching between platforms, improving team efficiency and post consistency.

Techstack : Angular, DRF, GPT-4 Model, PostgreSQL, REST APIs , OAuth2.0

SaFAR live

- Built a full-featured warehouse navigation and automation platform with modules for **shuttle listing**, **digital warehouse layout**, and **remote controls** for shuttles and lifts.
- Designed and developed intuitive UI flows using **React.js and Material UI** to monitor real-time warehouse activity and navigate between operational zones.
- Implemented predictive alerts and system dashboards for early anomaly detection, reducing maintenance downtime by **20%**.
- Streamlined inventory tracking and layout visualization, boosting location accuracy by **35%**.
- Built a scalable Express.js + PostgreSQL backend to manage assets, schedules, and control signals for warehouse systems.

Techstack : React.js, Material UI , Node.js, Express.js, PostgreSQL

Run Promo live

- Automated badge-based promotion workflows for Shopify, boosting campaign efficiency by 20%.
- Used GraphQL and REST APIs for syncing promotions, and implemented OAuth for role security.

Techstack : React.js, Node.js, Express.js, Shopify API, Polaris

Education

Full Stack Web Development, Masai School, Bengaluru

Oct 2021 - Sep 2022

Bachelor of Science, Utkal University, Bhubaneswar

Aug 2018 - Nov 2021

Certifications & Achievements

- Masai School - N.S.D.C Certified
- HackerRank - Problem Solving
- Great Learning - Full Stack Training
- Delivered 10+ production features in record sprint time for client delivery.
- Consistently rated high in peer and team performance feedback.

Availability

Open to full-time remote/hybrid/onsite roles. **Immediate Joiner.**
