GIT

SUMMARY

- As a PHP Laravel developer with 1 year of experience
- I excel in crafting dynamic web applications using the Laravel framework, implementing Model-View-Controller (MVC) architecture for the development of scalable and robust solutions.
- My proficiency extends to PHP programming, enabling me to write clean and efficient code, with additional knowledge in languages like VB.NET, contributing to a versatile skill set.
- I bring expertise in desktop application development through Windows Forms and WPF, providing a holistic understanding of both web and desktop application landscapes.
- Adept in databases, I am well-versed in working with MySQL, ensuring sound database design and implementation.
- I have experience in frontend technologies, including HTML and CSS, allowing me to create visually appealing web applications that deliver a seamless user experience.
- Experienced in working with HTML and CSS, allowing me to create visually appealing web applications and ensure a smooth user experience.
- My familiarity with JavaScript and frameworks such as Angular and React equips me to create interactive and responsive web applications.
- I possess proficiency in AWS services like EC2, S3, and RDS for the design and of scalable and secure web applications.
- My expertise extends to version control tools like Git, facilitating efficient code management and collaboration within a team.
- I bring knowledge of software testing methodologies, including unit testing and integration testing, ensuring the delivery of high-quality software.
- Known for excellent analytical and problem-solving skills, I can quickly identify and resolve complex issues.Excellent With strong communication and teamwork skills, I collaborate effectively with fellow developers, project managers, and stakeholders to achieve project goals.

EDUCATION

Jamal Mohamed College (Affiliated to Bharathidasan University)

BCA

EXPERIENCE

Novitas Technologies Private Limited

Bangalore (Jan 2023 to Present Now)

PROJECTS

E-Commerce

Acne Studios

Jan 2023 – Present Now

- *Acne Studios is a Swedish fashion brand that was founded in Stockholm in 1996 by Jonny Johansson. The brand initially started out as a denim label, but it has since expanded to include a wide range of ready-to-wear clothing, accessories, and footwear for men and women.*
- *Acne Studios is known for its minimalist, contemporary designs that combine clean lines, functional details, and high-quality materials. The brand's aesthetic is often described as "Scandinavian chic," with a focus on understated elegance and modern simplicity.*

ROLES & RESPONSIBILITY

- *Developing and maintaining the company's e-commerce website, ensuring that it is functional, user-friendly, and up-to-date.*
- *Collaborating with designers and other teams to develop new features and functionality for the website.*
- *Conducting testing and debugging to ensure that the website functions properly across different devices and browsers.*

- *Developing and maintaining internal software systems used by different departments, such as inventory management and customer relationship management.*
- *Implementing and maintaining security measures to protect customer data and prevent cyberattacks.*
- *Optimizing website speed and performance to ensure a smooth user experience.*
- *Staying up-to-date with industry trends and emerging technologies to identify opportunities for innovation and improvement.*
- *Working with third-party vendors and service providers to integrate new software and tools into the company's systems.*
- *Troubleshooting technical issues and providing support to other departments as needed.*
- *Participating in regular meetings and collaborating with other team members to ensure the smooth operation of the company's digital systems.*

DECLARATION

"I hereby declare that the information provided above is true to the best of my knowledge and belief."
