Objective

I seek challenging opportunities where I can fully use my skills for the success of the organization.

Summary

- AI and machine learning engineer with skills in Data science also. Expert in Python. Proficient in technologies such as Tensorflow, Scikit-learn

Education

- **Delhi Public school Durg** 2022
12 Graduation
76.2
- **KIIT University** 2026 (To be Graduated)
Btech
8.46 (Current)

Skills

- Tools: Python 3.0, C
- Packages: Numpy, Pandas, Matplotlib, Scikit-Learn, Jupyter Notebook, Tensorflow 2.0
- Machine learning/Data learning - Statistical Analysis, Linear logistics regression, Data visualisation, Classification, Clustering
- Neural Networks: Deep Learning, Transfer Learning, Object identification, Image Detection and Classification

Projects

- **Predicting Heart Disease using Machine learning**
Used the data provided to predict whether the person has Heart disease or not, visualised the data, made prediction and achieved an accuracy of 98 percent
- **Predicting the sale price of bulldozers using ML**
Used the data provided to predict the sale price of bulldozers, visualised the data, made prediction and achieved an accuracy of 98 percent
- **Dog Breed Detection using transfer learning, deep learning**
On the basis of 10000 images successfully detected 120 breed of dogs

Languages

- English - Fluent Hindi - Native Bengali - Fluent

Certification

- **Complete Machine learning and Data science BootCamp 2023**
Instructors - Andrei Neagoie, Daniel Bourke
