EXPERIENCE

Associate Software Engineer

Hyderabad

Eaglemont Software pvt Ltd

2022 - Present

In my role, I've designed and implemented numerous UI components, focusing on visually appealing and user-friendly interfaces. I've played a key role in integrating APIs, facilitating seamless communication between frontend and backend systems. Leveraging Redux, I've managed application state to ensure smooth data flow and optimized performance. Our team comprises passionate professionals dedicated to innovative web application development, prioritizing user experience and functionality.

- Technology : Html , Css , Scss , React js , Redux , Antd , React Native etc .

Frontend Developer

Remote

XcitEducation Foundations

2022

(Internship)

- Technology : Html , Css , Javascript ect .

PROJECTS

ED-Pedia (LMS)

2022 - Present
Location

Technologies – HTML, CSS, Javascript ,React, Redux, SQL, ANTD, SCSS

- Ed-pedia is an All-in-One Learning Management System (LMS) that showcases contribution to developing a comprehensive educational tool. Each module features specifically designed components, meticulously crafted to fulfill essential functions. These components are structured to facilitate various crucial functionalities within their respective modules. For example, in the institute admin module, components handle administrative tasks, resource management, academic oversight, and institutional efficiency.

E-Commerce Website

2022
Location

Technologies – HTML, CSS, JS, Bootstrap, React

- On my e-commerce website, I've implemented a user-friendly sign-in and sign-out feature through Gmail authentication. This integration simplifies the registration process and enhances security, boosting convenience and trust for users. An e-commerce website provides an online platform for browsing, shopping, and purchasing diverse products and services from home.

React Admin Dashboard

2023
Location

Technologies used: React JS, Context API, Redux ,Typescript

- The dashboard features a visually appealing and user-friendly interface, designed with React's component-based architecture for seamless navigation. Users can personalize their dashboard by adding, removing, or rearranging widgets to suit their needs, empowering them to customize the interface according to their preferences and priorities.

Parent App

2024
Location

Technologies - React Native , Redux

- Project App is a mobile application developed using React Native. Serving as a parent application, it provides comprehensive access to student information. With Project App, users can effortlessly view and manage all aspects of student data, ensuring streamlined communication and efficient organization.
