About Me

I am a highly skilled and motivated professional with a strong academic background, holding both Bachelor's and Master's degree in Computer Applications (BCA and MCA). With 1-2 years of projects experience in Software Development, Application Development, Machine Learning (Supervised and Unsupervised) and Deep Neural Networks. I am an accomplished machine learning engineer with a solid background, bringing 11 months of valuable internship experience to the field. My expertise lies in developing innovative machine learning solutions centered around predictive modeling.

Education

- ❖ **MASTER: COMPUTER APPLICATION(MCA).**
GANDHI INSTITUTE FOR TECHNOLOGY(GIFT), BHUBANESWAR, ODISHA.
CGPA: **8.51/10.00** Completed in 2020-2022.
- ❖ **BACHELOR: COMPUTER APPLICATION(BCA).**
TILAK MAHARASHTRA VIDYAPEETH (TMV), PUNE, MAHARASHTRA.
CGPA: **8.48/10.00** Completed in 2017-2020.
- ❖ **XII: COUNCIL OF HIGHER SECONDARY EDUCATION**
SHAHEED (JUNIOR) MAHAVIDYALAYA, BARAPUR, BHADRAK, ODISHA.
Percentage: **49.5/100** Completed in 2015-2017.
- ❖ **X: BOARD OF SECONDARY EDUCATION**
SATYA NANDA HIGH SCHOOL, SORO, BALASORE, ODISHA.
Percentage: **62/100** Completed in 2014-2015.

Skills

PYTHON

JAVA

DATA STRUCTURE

C & CPP

ASP.NET

C#

AI & MACHINE LEARNING

NLP

DEEP LEARNING(ANN,CNN,RNN)

IMAGE PROCESSING

COMPUTER VISION

LLM

DATA ANALYSIS

EDA

REGRESSION(LINEAR & LOGISTIC)

RENDOM FOREST

BOOSTING TECHNIQUES

CLUSTERING

SVM

PCA

DECISION TREE

PANDA

NUMPY

SCIKIT-LEARN

TENSORFLOW

KERAS

SEABORN

MATPLOTLIB

OPENCV

DJANGO

FLASK

WEB-SCRAPPING

ANDROID APP DEVELOPMENT

SPRINGBOOT

FULL STACK WEB DEVELOPMENT

ORACLE(SQL & PLSQL)

POSTGRESQL

MYSQL

MSSQL SERVER

NOSQL

MONGODB

JSON

GOOGLE CLOUD(FIREBASE)

RHEL LINUX(6 & 7)

Experience

- ❖ **BACKEND DEVELOPER**
PINACA TECHNOLOGY
04/2024 - Present 📍 Hyderabad, Telangana, India
 - I specialize in backend development, managing various Python libraries such as NumPy, Pandas, Django, and Flask. Additionally, I am proficient in database management systems including Microsoft SQL Server 2022, MySQL, and MongoDB.
 - My primary responsibilities involve overseeing the backend operations of projects, ensuring seamless functionality and efficient data management.
- ❖ **INTERN AS MACHINE LEARNING ENGINEER**
REFACTOR ACADEMY
08/2022 - 06/2023 📍 Bangalore, Karnataka, India
Learned the mathematical intuition behind various machine learning algorithm viz. Supervised and unsupervised machine learning. My job was to analyze data and based on that data I had to create Machine Learning/Deep Learning models. Here I have worked on a variety of AI/ML projects such as:
 1. **Ecommerce Customers Data Analysis:**
Problem Statement :- Actually it is a project of analyzing customer's data.
Project GitHub Link: [github/Ecommerce-Cust-ML](https://github.com/Ecommerce-Cust-ML)
 2. **Mall Customer Segmentation Data Analysis:**
Problem Statement: You are the owner of the mall and want to understand the customers who can easily congregate so that the marketing team can understand and plan the strategy accordingly.
Project GitHub Link: [github/ Mall-Customer-ML](https://github.com/Mall-Customer-ML)
- ❖ **INTERN AS PYTHON DEVELOPMENT**
SKILLS CAFE
02/2020 - 06/2020 📍 Pune, Maharashtra, India
In this internship I worked on several python libraries like NumPy, Pandas Django and OpenCV. My job was to look after the backend work of the projects.
 1. **Image Converter:** In this project we used Python Here we used to take an image and convert that image to some different size.
GitHub Link: [github/Msahoo876/Image-Converter](https://github.com/Msahoo876/Image-Converter)
 2. **Image Rotation:** In this project we have used Python Here we used to take an image and rotate that image in different angles
GitHub Link: [github/Msahoo876/Image-Rotation](https://github.com/Msahoo876/Image-Rotation)
 3. **Notepad In Python:** In this project we used Python. It is simply Notepad is a simple text editor for Windows;
GitHub Link: [github/Msahoo876/Notepad-In-Python](https://github.com/Msahoo876/Notepad-In-Python)

Person Projects

❖ 30 YEARS OF STOCK MARKET DATA ANALYSIS

- Data consists of 30-years of Close prices for various market indexes, commodities, agriculture and US Treasure Bills.Yahoo Finance Python API. Stock market data spanning 30 years can provide a rich source of information for analysis and modeling.
- **Project GitHub Link:** [github/Stock_Market_Analysis](https://github.com/Stock_Market_Analysis).

❖ DIABETICS PREDICTION

- The data was collected and made available by “National Institute of Diabetes and Digestive and Kidney Diseases” as part of the Pima Indians Diabetes Database.
- Several constraints were placed on the selection of these instances from a larger database. In particular, all patients here belong to the Pima Indian heritage (subgroup of Native Americans), and are females of ages 21 and above.
- **Project GitHub Link:** [github/Diabetic_Predction](https://github.com/Diabetic_Predction).

❖ AMAZON CUSTOMER RATING ANALYSIS

- In the ever-evolving world of e-commerce, Amazon.com stands as a pioneering giant. Known for its innovative spirit and remarkable journey, Amazon has not only experienced glorious heights but also faced intriguing challenges along the way.
- It comprises an extensive collection of over 2 million customer reviews and ratings of beauty-related products available on Amazon’s platform.
- **Project GitHub Link:** [github/Amazon_Cust_Rating](https://github.com/Amazon_Cust_Rating).

❖ CONFUSION MATRIX USING ANN

- In this project we have some data in that we will find the confusion matrix using ANN technique. Here True Positive value is 13, True Negative is 2, False Positive is 5, False Negative 0.
- **Project GitHub Link:** [github/Cofusion_Data_Analysis](https://github.com/Cofusion_Data_Analysis).

❖ BLOOD BANK MANAGEMENT SYSTEM

- The Online Blood bank management System(Django Freamwork) is to create an e- Information about the donor and organization that are related to donating the blood.
- Through this application any person who is interested in donating the blood can register himself in the same way if any organization wants to register itself with this site that can also register. Moreover if any general consumer wants to make request blood online he can also take the help of this site.
- **Project GitHub Link:** [github/Blood_Bank_website](https://github.com/Blood_Bank_website).

❖ EZ2LEARN

- Actually this was my startup project in this project I used Android(Java,XML) and Cloud(Firebase). This project is for online learning platform where students can easily enhance their knowledge in some good technologies.
- **Project GitHub Link:** [github/Ez2Learn](https://github.com/Ez2Learn).

❖ GET SECURE APPLICATION

- In this Project we used Android(Java, XML), Cloud(Firebase), SQLITE. It is for Women safety application. Here if any problems happens to the women’s then they can send their- live location to the police and there family & friends, it was the live application. I did this for one client.
- **Project GitHub Link:** [github/Get_secure_App](https://github.com/Get_secure_App).

❖ SMART VILLAGE APPLICATION

- In this Project we have used Android(Java, XML) and Cloud(Firebase). Here villagers can easily view the details of village like population, annual profit of the village, Government notice.
- Also villagers can chart with the application support team for any major problem. Also they can do online shopping. It was the live application. I did this for a client.
- **Project GitHub Link:** [github/Smart_Village_App](https://github.com/Smart_Village_App).

❖ CRIME FILE SYSTEM

- In This Project we used Vb.net and Sql. The main work of this project is handling the criminal details as well as sending some encrypted message to some other police station
- **Project GitHub Link:** [github/Crime_file_system](https://github.com/Crime_file_system).

Skills: Python, Artificial Intelligence, Machine Learning (Regression models, Boosting Techniques, Decision Trees, Clustering Techniques, Random Forest, PCA, SVM), Deep Learning (ANN, CNN, RNN), Image Processing, Data Analysis, Calculation, Panda, Numpy, Data Structure, Seaboen, SkLearn, Django, OpenCV, Flask, REST API, Java, Android, Oracle, SQL, MYSQL, PostgreSQL, NoSQL, Google Firebase.

Publication

❖ DIAGNOSIS OF PLANT DISEASES BY IMAGE PROCESSING MODEL FOR SUSTAINABLE SOLUTIONS ICISML

- In this, we have tried to solve the problems of the farmers. Here we took disease pictures of plants and we have tried to predict what type of disease that plant have and what is the permanent solution for that disease.
- Here we have used some amazing kinds of technology like Machine Learning for plotting the RGB image, In Deep Learning we used CNN for creating some hidden layers, In Image Processing we used VGG19 Model for creating the Model or Artificial Mind to detect the disease of plant.
- **Springer link of my published paper:** [Plant_Paper](#)
- **Certificate Link:** [EAI_Conferance_link](#)

Skills: Python, Artificial Intelligence, Machine Learning, Image Analysis, Deep Learning, CNN, Image Processing, VGG19, Pandas, Numpy, Seaborn, Matpoltlib.

Certification

❖ NPTEL CERTIFICATES

- **Java Certificate:** [/NPTEL/Java](#).
- **Internet Of Things:** [/NPTEL/IOT](#).
- **Cloud Computing:** [/NPTEL/Cloud-computing](#).
- **Software Project Management:** [/NPTEL/SPM](#).

❖ HACKER RANK CERTIFICATES

- **Java Certificate:** [/HackerRank/Java](#).
- **Python Certificate:** [/HackerRank/Python](#).
