

EXPERIENCE

• Software Engineer, Espire Infolabs

September 2021 - November 2023
Gurugram, India

Projects

•Hydropool: Shopping Applications

A commercial swimming pool company

- Managed the end-to-end development of Sitecore-driven websites, including content creation, template development, and integration with external systems.
- Optimizing the project performance, scalability and ensuring cross-browser compatibility.
- Implemented release processes, ensuring smooth deployments, and minimizing potential service disruptions.

•Ceva Logistics : Providing Courier Services

- Formulated and implemented robust business rules, UI policies, and client scripts, resulting in enhanced data and significantly improved user interaction across the platform.
- Reviewed project specifications and designed technology solutions that meet or exceeded performance Expectations.
- Implemented and customized front-end frameworks such as React.js, improving overall application performance.
- Collaborated with UX/UI designers to iterate on designs, provide input on user interactions, and implement visual elements.
- Implemented Lazy Loading that reduces the website load time by 400ms.

•NHS 24 : Health and Care Services

Providing Digital health and care services in Scotland.

- Designed various web pages.
- Designed and implemented responsive user interfaces as designed in Figma.
- Implemented efficient caching mechanisms, and employing best practices to handle high traffic volumes.
- Developed and maintained user interfaces for web applications, ensuring optimal performance and responsiveness.

PERSONAL PROJECTS

•MagicCart: Online Shopping Application

Project Link

An online shopping e-commerce application achieved through integration of robust technological implementations.

- Crafted with meticulous attention to detail, our application boasts a clean and intuitive user interface that ensures a seamless shopping experience.
- Offers a comprehensive suite of functionalities, enabling users to effortlessly explore a diverse range of products, create personalized wish lists, curate a virtual shopping cart, and seamlessly finalize their purchases.
- Implemented debouncing on search which minimized the number of API calls and ensured a more fluid and efficient user experience.
- Offered users a frictionless payment process by seamlessly integrating the Razorpay payment gateway.
- Capability to dynamically manage user carts, wishlists, and orders, providing an intuitive and organized shopping journey.
- Implemented Infinite Scroll that increased user attention by 40%.

TECHNICAL SKILLS and INTERESTS

Languages: JavaScript,

Libraries: ReactJS, React Router

Web Dev Tools: HTML, CSS, Bootstrap, Tailwind CSS, SASS

Tools: Git, Figma, Jira

Areas of Interest: Web Design and Development, System Design

EDUCATION

•Guru Gobind Singh Educational Society Technical Campus

2016-20

Bachelor of Technology in Computer Science and Engineering
