Professional Experience

2020/08 – 2023/09
Bangaluru, India

Manual Test Engineer

WFconnect Technologies Ltd

Experienced Software Test Engineer specializing in B2C applications for hospital management. Skilled in ensuring the reliability and efficiency of systems that centralize doctor schedules, patient records, billing, and more. Committed to streamlining operations and enhancing overall processing efficiency through rigorous testing and adherence to industry standards.

Projects

2020/08 – 2023/09

Healthcare Domain

My Roles & Responsibilities Include:

1. Analyzing and validating business requirements for completeness and accuracy, aligning closely with Agile principles.
2. Executing test cases using **Test Case Design Techniques**, ensuring thorough coverage and adherence to project specifications.
3. Reporting findings in **JIRA**.
4. Generating **Regression Testing, Test Cases** by extracting requirements from available documentation, maintaining the integrity of the software through iterative development cycles.
5. **Retesting** defect fixes with each release build, contributing to the continuous improvement of the product.
6. Conducting **Smoke & Sanity, functional, system Integration, Retesting & Regression testing**.
7. Participating in weekly status meetings with teams and developers, fostering effective communication and problem-solving.
8. Providing Knowledge Transfer (KT) sessions to juniors, sharing expertise and best practices to support their professional development and ensure team proficiency in **Agile Testing Methodologies**.
