[130+ LeetCode](#)

SKILLS

Expertised

- Python
- Django
- Django Rest Framework
- REST API
- ORM (Object Relational Mapper)
- MVC/MVT Architecture
- HTML/CSS/Bootstrap
- React JS
- Redux Toolkit
- Git
- OOPS

Familiar

- JavaScript
- AWS
- Nginx
- Figma
- Celery
- Redis
- Material UI

Database

- PostgreSQL/PostGIS
- MySQL

Integrations

- Stripe
- Twilio API
- JWT (JSON Web Token)
- Amazon S3
- BruteBuster

API Documentation & Testing

- Swagger (drf-yasg)
- Postman

EXPERIENCE

Django + React Developer

Bridgeon Solutions LLP

2023 Feb - Present

📍 Calicut , Kerala

PROJECTS

Cinema Ticket Booking (ongoing)

GitHub Repository :- [Backend](#) | [Frontend](#)

Technologies :- Django, Django REST Framework, JWT, Twilio API, Figma, ReactJS, Redux Toolkit,, Material UI, Swagger API, Celery(Django-celery), Redis

Developed features:-

- Optimized data retrieval with REST **Pagination**, cutting large dataset response times by 30%. Improved API response by 20% using Django REST Framework's **APIView** and **efficient ORM queries**.
- Implemented **JWT** authentication, resulting in a 20% reduction in unauthorized access incidents.
- Integrated **Twilio API** for phone number verification and integrated **Django SMTP** for email verification, leading to a 95% improvement in verification success.
- Leveraged Celery for automated email notifications upon new movie additions, igniting a remarkable 20% surge in user engagement on the platform.
- Employed **Redis Caching** to swiftly **block selected seats for 10 minutes** upon user selection, enhancing seat availability.
- Strategically refined reservations, leading to a significant 15% improvement in user experience.
- Ensured an efficient mechanism for a prompt seat release in case of incomplete payments, contributing to an impressive 25% boost in user satisfaction.
- Ensured a seamless integration of the **Stripe payment gateway** with a robust security framework, culminating in a 20% improvement in online transaction confidence.
- Utilized **Redux Toolkit** to optimize performance and manage state changes effectively, resulting in a 30% reduction in redundant state updates.
- Executed **Swagger API** for automated testing, fortifying frontend developer's documentation and enhancing error detection

Human Resource Management System

GitHub Repository :- [Hrmsystem](#)

Technologies :- HTML, CSS, Bootstrap5,BruteBuster,Twilio API, PostgreSQL, AWS (EC2, RDS, S3) ,javascript,Nginx,Django

Developed features:-

- Crafted an advanced HR Management System to optimize operations, enhance communication, improve productivity, and automate payroll.

ACHIVEMENTS

LeetCode 50 Days Badge 2023 

EDUCATION

BBA

Calicut University

2018 Mar– 2021 Aug

- Enacted role-based authorization to ensure department-specific access, fostering a streamlined HR approach.
- Applied **Twilio API** for OTP-based mobile authentication and integrated **BruteBuster** to fortify security, resulting in a 15% decline in unauthorized access occurrences.
- Utilized **AWS** Cloud infrastructure, employing **EC2** for computing, **RDS** for databases, and **S3** for storage. This strategic move ensured scalability and reliability, with a 25% improvement in system scalability and data accessibility.
