

MONALISHA JENA

Software Engineer | Python & Django Developer

+91-7735197331 • iammonalishajena@gmail.com • Bhubaneswar → Bangalore (Relocation Ready)

LinkedIn: <https://www.linkedin.com/in/monalisha-jena-b734a7209/>

PROFESSIONAL SUMMARY

Results-driven Software Engineer with ~3 years of experience building scalable backend systems and RESTful APIs using Python and Django. Proven track record delivering mission-critical government-scale web applications handling high-volume data. Strong expertise in asynchronous task processing (Celery + RabbitMQ), security auditing, and MongoDB operations. Actively relocating to Bangalore to join a high-impact engineering team.

TECHNICAL SKILLS

Languages:	Python (Advanced), SQL
Frameworks:	Django, Django REST Framework (DRF), FastAPI, Flask, Celery
Databases:	MongoDB, PostgreSQL, MySQL
Tools & DevOps:	Git, GitLab, RabbitMQ, Flower, VS Code, Jupyter Notebook
Security:	Burp Suite — XSS, Session Hijacking, Brute-force, Host Header Attacks
Concepts:	RESTful APIs, OOP, ORM, Async Task Processing, Microservices

PROFESSIONAL EXPERIENCE

Software Engineer | Secuodsoft Technologies Pvt Ltd | Bhubaneswar Sep 2023 – Present

Project: Hydromet — Hydro-Meteorological Data Processing Portal (Govt. of Odisha)

- Designed and developed RESTful APIs using Django REST Framework with class-based views and third-party API integrations, serving the Dept. of Water Resources.
- Conducted Burp Suite security audits identifying and remediating critical vulnerabilities including XSS, session hijacking, brute-force attacks, and host header injection.
- Authored comprehensive API documentation improving integration efficiency for internal teams and government stakeholders.

Project: ORTPSA — Odisha Right To Public Services Act Portal (Govt. of Odisha)

- Architected and single-handedly built a real-time, scalable Queue Management System (QMS) using Python, Django, Celery, RabbitMQ, and MongoDB for high-volume service processing.
- Implemented real-time async task monitoring via Flower dashboards and custom Django admin panels, improving operational visibility.

Project: MSP — Mukhyamantri Shiksha Puraskar (Dept. of Education, Govt. of Odisha)

- Automated data processing pipelines for State, District, and Block-level merit datasets using Python scripts — reducing manual processing time significantly.
- Delivered key MSP web application features: user session management, dynamic award reporting, API updates, and automated password generation using Django.
- Managed MongoDB database operations including large-scale updates, deletions, and backups across AWARDS and MeritTemp databases.

Prompt Engineer | Confluxe Marketing Pvt Ltd | Bhubaneswar Jan 2023 – Jul 2023

- Diagnosed production issues and optimized API performance with logging and monitoring solutions built on Python, Flask, and Django.
- Analyzed and documented existing business processes to identify inefficiencies, collaborating with managers to implement improvements.

EDUCATION

B.Tech — Computer Science & Engineering | Biju Patnaik University of Technology (BPUT)

KEY HIGHLIGHTS

- Delivered 3 production-grade government projects end-to-end with real-world user impact across Odisha.
- One of very few backend developers with hands-on Burp Suite security auditing skills — a rare and valued skill in MNCs.
- Built an entire async task-processing system (QMS) independently — demonstrating strong ownership and architecture thinking.
- Open to immediate relocation to Bangalore with a strong desire to contribute to high-growth engineering teams.
