Professional Summary

Results-oriented Software Developer with hands-on experience in Python, Django, REST APIs, and scalable web applications. Built real-world systems featuring authentication, payment integration, and AI-powered functionality. Strong foundation in Data Structures and Algorithms with active problem-solving practice on HackerRank.

Technical Skills

Languages: Python, JavaScript, SQL

Frameworks/Libraries: Django, Pandas, NumPy, Scikit-learn, FAISS

Tools/Platforms: Git, GitHub, Bootstrap, VS Code

Databases: SQLite, PostgreSQL

Core Concepts: Data Structures and Algorithms, OOP, REST APIs, Authentication, Payment Integration

Experience

Fullstack Python Intern

Jul 2024 – Jan 2025

Seeree Services Pvt. Ltd., Bhubaneswar

- Developed and maintained Django-based web applications with backend logic, database integration, and responsive UI components.
- Built and tested REST-style features, improving application workflow and overall maintainability.
- Debugged frontend and backend issues, optimized queries, and supported production-level feature delivery in a team environment.

Projects

Mr Mech 360 - Vehicle Service Platform

Django, Python, SQLite

- Developed a multi-role service platform for customers, garage owners, and mechanics with secure OTP-based authentication.
- Built booking workflows, status tracking, premium responsive dashboards, and Razorpay payment integration.
- Planned AI-driven garage recommendation features to improve service discovery and user experience.

Online Book Store with AI Chatbot

Django, FAISS, OpenAI API

- Built an AI-powered chatbot for book search, order tracking, and support assistance inside the web application.
- Implemented semantic search using FAISS and created backend APIs for chatbot interactions and intelligent query handling.

Education

Bachelor of Technology in Computer Science and Engineering

2022 – 2026

Einstein Academy of Technology and Management

Achievements

- Solved 100+ DSA problems on HackerRank with regular practice in arrays, strings, recursion, sorting, and searching.
- Built multiple full-stack academic and personal projects focused on real-world workflows and problem solving.
