EDUCATION

KALINGA INSTITUTE OF INDUSTRIAL TECHNOLOGY, BHUBANESWAR

2022-2024

Master of Computer Application

- CGPA : 8.24

SALIPUR AUTONOMOUS COLLEGE, SALIPUR

2019-2022

Bachelor of Science in Mathematics

- CGPA : 8.20

JAWAHARLAL NEHRU H.S SCHOOL, KUANPAL

2017-2019

Council Of Higher Secondary Education, Odisha

- PERCENTAGE : 62.5

HANUMANJEW BIDYANIKETAN, RANIGODA

2016-2017

Board Of Secondary Education, Odisha

- PERCENTAGE : 73.16

SKILLS

LANGUAGES : Python | Java | SQL | HTML and CSS

FRAMEWORKS : Numpy | Pandas | Scikit-learn | Matplotlib

TOOLS : PowerBI | Tableau | Excel | SQLite | Powerpoint

COURSEWORK : Data Analysis | Artificial Intelligence | Machine Learning | Object Oriented Programming | DSA | Software Engineering | NLP

SOFT SKILLS : Excellent Communication | Time Management | Adaptability

TRAINING AND INTERNSHIPS

HIGHRADIUS INTERNSHIP PROGRAM

12/2023 - 01/2024

- Digital Marketing

SAP - ABAP TRAINING

10/2023 - 01/2024

- ABAP training

AICTE-EDUSKILLS VIRTUAL INTERNSHIP

04/2023-06/2023

- Data Analytics

CELEBAL SUMMER INTERNSHIP

05/2023 - 07/2023

- Data Science

PROJECTS

MULTIMODAL VIRTUAL ASSISTANT

- Developing an advanced virtual assistant capable of interacting through voice, text, and gestures for a seamless user experience.
- Created a cutting-edge multimodal assistant, integrating voice, text, and gesture functionalities to enhance user interaction.

HEART DISEASE PREDICTION USING MACHINE LEARNING

- Developed a machine learning-based model for accurate prediction and early detection of heart disease.
- Utilized advanced ML techniques to analyze medical data and provide personalized risk assessment for heart-related ailments.

TOURISM DATA ANALYSIS FOR ODISHA

- Utilized advanced data analysis techniques to uncover insights and trends in Odisha's tourism data.
- Implemented statistical models and visualization tools to analyze and interpret tourism data from various sources in Odisha.

EMAIL SPAM DETECTION USING NAIVE BAYES

- Utilized the Naive Bayes algorithm to develop a highly accurate and efficient email spam detection system
- Trained the model on a diverse dataset to ensure robustness and adaptability to various types of spam emails.
