PROJECTS

Empowering Connections and Transactions in the Steel Industry [🔗](#)

Language and Technologies involved - HTML, CSS, React js, Python, ERPNext and Frappe

Team Size - 4, Duration – 11 Months, Roles and Responsibility: Software Developer

- Development and coordination with Team.
- Code production, Unit Testing and Integration testing of the application.
- Testing and Implementation

Project Description –

- Perfect Dalal stands as a beacon of efficiency and connectivity within the steel industry. This dynamic online platform streamlines the intricate processes of buying, selling, and bidding on steel products, catering to the needs of both suppliers and buyers alike. By providing a centralized marketplace, Perfect Dalal fosters seamless interactions between industry professionals, facilitating swift and effective transactions. In an era defined by rapid digitalization and heightened demand for streamlined processes, Perfect Dalal emerges as the ultimate solution, empowering stakeholders to navigate the complexities of the steel market with ease and confidence.

Expert Insights on Knee Health [↗](#)

Language and Technologies involved - HTML, CSS, Bootstrap, Python, ERPNext and Frappe
Team Size - 3, Duration – 4 Months, Roles and Responsibility: Software Developer

- Development and coordination with Team.
- Code production, Unit Testing and Integration testing of the application.
- Testing and Implementation

Project Description –

- Kneexpert.in appears to be a website dedicated to knee health and expertise. While I can't access the specific content of the site directly, based on the URL, it likely provides information, resources, and possibly services related to knee health, including conditions, treatments, exercises, and expert advice. It might offer insights on how to maintain healthy knees, prevent injuries, and rehabilitate after knee-related issues. If you're interested in knee health or have specific concerns about your knees, it could be a valuable resource to explore.

Ag-Tech Portal [↗](#)

Language and Technologies involved - HTML, CSS, React js, Bootstrap, Node js and Express js
Team Size - 5, Duration – 5 Months, Roles and Responsibility: Associate Software Engineer

- Development and coordination with Team.
- Code production, Unit Testing and Integration testing of the application.
- Testing and Implementation

Project Description –

- A dynamic dashboard powered by ReactJS and NodeJS, revolutionizing administrative management. Dive into a sleek interface displaying user profiles, roles, and vital work data. Admins command authority, effortlessly modifying names, roles, and usernames with precision. Exclusive access ensures security, permitting only authorized changes from the intuitive dashboard. With ReactJS for fluid frontend design, ExpressJS for sturdy backend support, and MySQL for seamless data management, Ag Tech Portal is the pinnacle of efficiency and style, captivating the market with its unparalleled functionality and allure.
