Profile

Experienced NoSQL Database Administrator with a strong background in managing **Apache Cassandra & MongoDB** over **4+years** of expertise in **Live Ops Monitoring, Designing, Optimise Performance, routine database maintenance tasks, including backups & restores and recovery procedures to minimize downtime and Maintaining** NoSQL Databases to support diverse application requirements. Seeking a challenging opportunity to apply my skills and contribute to an Organization's Data Infrastructure.

Professional Experience

Database Administrator | UST

2020 – present

- Real-time monitoring of cluster performance and health,Key metrics include read/write latency, throughput, disk usage and node status using multiple tools like Datadog,Percona and DataStax OpsCentre.
- Proficiently managed Apache Cassandra & MongoDB Databases, ensuring optimal performance, security and high availability for critical applications.
- Automate routine database tasks, including monitoring, maintenance and scaling activities to enhance operational efficiency.
- Manage and administer live databases to ensure high availability and optimal performance for online applications.
- Conducted routine health checks, identifying and proactively addressing potential issues to maintain a stable database environment.
- Proactively optimize query performance, addressing performance bottlenecks and fine-tuning database configurations.
- Successfully installed, configured Databases,ensuring seamless operations and minimizing downtime.
- Perform routine database maintenance tasks, including backups, restores and recovery procedures to minimize downtime.

Education

B.Tech,

2013 – 2017 | Odisha, India

Orissa Engineering College, Bhubaneswar 7.23 CGPA

TECHNICAL SKILLS

OS

Linux,Windows

Database

Apache Cassandra,MongoDB

Languages

CQL,MQL

GUI

Studio 3T,Mongo Compass,Tableplus

Monitoring Tool

Percona,Axonops

Backup Tool

Commvault
