

PARTHA SARATHI NAYAK

 : parthanayak7735@gmail.com | ph.no: 6370240876 | LinkedIn: www.linkedin.com/in/partha-sarathi-nayak-106152227

EDUCATION

B. TECH | Institute of Technical Education & Research, Bhubaneswar, Odisha | CGPA – 7.2 aggregate **2019-2023**

12th Science | Royal College of Science & Technology, Bhubaneswar, Odisha (CHSE) | 57% aggregate **2017-2019**

10th | Royal High School, Balasore, Odisha (BSE) | 80% aggregate | **2017**

TECHNICAL SKILLS

- **Programming Language:** -Core Java, J2EE, Servlet, Hibernate, Spring, JDBC, SQL, HTML, CSS.
- **Other tools:** - VS Code, Eclipse IDE, Apache TOMCAT, Git/GitHub

RELEVANT PROJECTS:

Online book store:

- Developed an Online Book Store using Java, integrating RESTful APIs for efficient client-server communication and SQL for managing book inventory and transactions.
- Implemented secure payment gateways and user authentication for safe transactions. Designed dynamic web content using Java Servlet, JSP, and Thyme leaf, providing an interactive user experience.
- Built an admin interface with CRUD operations for managing books, categories, and authors, secured by role-based access control.
- Enhanced performance with efficient algorithms and database indexing, reducing load times. Performed unit and integration testing with JUnit to ensure reliability.
- Deployed the application on Apache Tomcat, ensuring scalability and high availability. Followed Agile methodologies and participated in sprints and code reviews.
- Technologies used: -**Front -End Development: HTML, CSS, JavaScript, Back-End Development: Java, J2EE, JDBC, Servlet, Database: SQL, Spring Boot: for rapid application development and dependency management.**

Doctor's Appointment Booking:

- Developed an online doctor's appointment system using Java, enabling streamlined scheduling for doctors and patients.
- Implemented RESTful APIs for efficient data handling and communication between front-end and back-end. Designed a SQL database to manage patient data, doctor schedules, and appointment records.
- Integrated secure user authentication and role-based access control for protecting sensitive patient information.
- Used Java Servlet and JSP to create dynamic, user-friendly web pages. Added features for managing patient and doctor information, booking appointments, and checking doctor availability.
- Conducted unit testing with JUnit to ensure reliability.
- Optimized performance through database indexing and efficient algorithms. Followed Agile methodologies, participating in daily stand-ups and code reviews.
- **Technologies used: -Core Java, Advance Java like: JDBC, JSP, JPA, Servlet, Hibernate, SQL, HTML, CSS**

STRENGTHS:

- Good listener.
- Always eager to learn new things and try to give my best in it.
- Determined and dedicated.

DECLARATION

I hereby declare that the information provided above is true to the best of my Knowledge and I bear the responsibility of the correctness of the above-mentioned particular.
