Profile

Front-End Developer with 3 years of experience specializing in Angular. Proficient in building scalable and responsive web applications using Angular and integrating APIs for enhanced performance. Strong expertise in state management and front-end optimization. Also experienced with API integration, database management, and WordPress development.

Skills

Languages: HTML5, CSS3, TypeScript, JavaScript,

Technologies & Tools: Angular, WordPress, Firebase, MySQL, MongoDB, Git, GitHub, postman

Frameworks & Libraries: Express.js, RESTful APIs

Other: WordPress Plugin Development, Elementor, Responsive Design

Work Experience

Communezen Ventures Private Limited(Uniliv), Delhi(Remote)

Apr 2023 - Feb 2025

Fullstack Developer

- Developed web applications with scalable APIs and third-party integrations.
- Delivered a responsive WordPress site for luxury accommodations, boosting client engagement.
- Optimized application performance, reducing load times by 25%.
- Worked on UI improvements, performance optimization, SEO, and security enhancements.
- Optimized page speed, responsiveness, meta tags, and structured data while securing forms against spam. Fixed technical issues to ensure smooth functionality across all devices.
- Developed an admin panel for the Society for Promotion of Youth & Masses (SPYM) project, where all collected information was managed. The panel was built using Angular for the frontend and Node.js with Firebase for the backend.

Apie Technologies, Bhubaneswar (Onsite)

Mar 2021 – Mar 2022

Web Developer

- Worked on multiple projects, tackling challenges in API integration, performance optimization, security, and real-time data handling.
- While working on a social media marketing platform, have integrated Twitter, Facebook, and Instagram APIs, overcoming API rate limits and implementation of Electron.js for automated photo printing with efficient queue management.
- Developed a matchmaking API for a dating app, optimizing and server-side caching to ensure real-time data processing and fast response times.
- In an AI-driven employee management system, had built a Dialogflow chatbot for employee queries, refining NLP models and integrating them with Angular and Node.js for smart interactions.
- For a healthcare management platform, implemented secure communication, role-based access, and multi-level authentication and encrypted data storage.
- Additionally, have worked on API testing using Postman, improving authentication, request/response validation, and performance optimization.
- These experiences have strengthened my skills in full-stack development and system security, making me a more efficient and adaptable developer.

Education

Kalam Institute of Technology, Berhampur, Odisha

Mar 2016 - Mar 2020

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering

Languages

- English (Professional)
